CHEESHINE

# CHEESHINE NOVEL MATERIALS ELEVATING RUBBER PERFORMANCE TO NEW HEIGHTS

A TRUE PIONEER IN THE RUBBER INDUSTRY

## RELIABLE PARTNER IN MATERIALS INNOVATION

Founded in 2005 and headquartered in Shanghai. We offer diversified and customized material solutions, focusing on new rubber and adhesive solutions for our customers.

As a National High-Tech Enterprise, Cheeshine leverages its Suzhou R&D Center and modern production bases in Jiangsu and Shandong. With four provincial-level R&D platforms, we provide integrated capabilities from molecular design to large-scale production of advanced rubber and adhesive materials.

Join us to innovate and elevate rubber performance to new heights.

- In-House R&D & Production
- Diverse Portfolio
- High Performance
- Cost-effective
- Sustainable

## A Strong Foundation You Can Rely On

### R&D STRENGTH

- Comprehensive Tire R&D Capabilities
- 100 Experts Driving Innovation
- 5M USD in R&D Equipment
- 108 Granted Patents
- 153 Patent Applications

### ROBUST MANUFACTURING CAPABILITY

**2 Major** Production Bases

**88,000m²** Jiangsu plant

**310,000m²** Shandong plant

**495K** Tons Annual Capacity

### ECO-CERTIFIED SYSTEMS

- IATF 16949 Certified
- Ecovadis Recognition
- EU REACH Compliant
- ISCC PLUS Certified

## FULL-RANGE SOLUTIONS

- $CO_2$ Neutralization Silica
- Plasticizer for Silica Compounds
- Environmentally Friendly Rubber Oil
- Tear-resistant Resin
- Adhesion Promoter
- Wet-skid Resistant Resin
- Multi-functional Crosslinking Agent
- Super Silane
- Processing Additives
- Bio-based Materials

## High-value & Customized Solutions

Analysis → Design → Testing → Concept → Development → Marketing

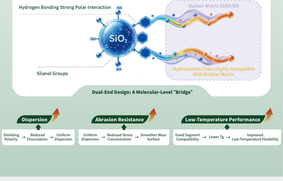

CHEESHINE National High-Tech

## A New-Generation Plasticizer EP365

**Re-engineered for High Silica Compounds**

### Why a New-Generation Plasticizer

### CHEESHINE EP365: A New-Generation Plasticizer
