## TINT WORLD

Tint World® is one of the oldest, largest and fastest growing companies in the window tinting and auto styling industry. Since opening in 1982, Tint World® has installed tint film on thousands of automobiles, homes, office buildings and watercraft all over the United States.

Tint World® was founded on the premise that if we treat our customers like family and friends; they will come back over and over again.

As our history shows, we truly believe in long-term relationships. In fact, we've been fortunate enough to have serviced many of our clients each time they get a new vehicle and as they have moved into their second or third homes or business locations. Our philosophy is simple: provide the best product available on the market, back it up with outstanding service and offer it at a fair and reasonable price. We also believe in operational excellence and are consistently striving to offer nothing but the best.

Tint World® Centers guarantee your satisfaction. You can always count on us for quality products, professional service installations and a friendly, knowledgeable staff. We invite you to visit Tint World® and see how we exceed your expectations and ensure your satisfaction.

# RESIDENTIAL

## WINDOW TINTING

WWW.TINTWORLD.COM

Tint World® can help you be more comfortable, save energy and protect your property. Tint World® offers a variety of window film options to protect your home from heat, weather conditions and intruders.

### Solar Control Window Films:

Solar window film installation is one of the most cost-effective improvements that can make your home efficient and comfortable, while greatly reducing harmful ultraviolet rays, glare and increasing privacy. Tint World® window films will help you maintain stable and comfortable interior temperatures, cutting your heating and air-conditioning usage by 30 - 40%.

### Designer Window Films:

Interior design films add a new dimension to any space. Decorative films are applied to glass to create a beautiful etched appearance without the associated high cost of sandblasting glass and without the need to remove the glass while the work is being done. The maintenance-free, fingerprint-resistant films create uniform appearance that disperses light softly, rendering a high-class, tranquil atmosphere.

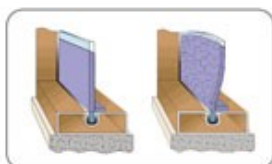

### Safety & Security Films:

Tint World® safety and security window films are specially structured and strengthened with a patented mounting adhesive. This adhesive works with the film to form a tough, protective shield that provides exceptional resistance to impact and explosive pressure, resulting in a reduction of shattering glass and airborne shards. Safety and security films can help protect your home from forced entry, theft or crime.

### Hurricane & Storm Films:

Glass is always one of the first casualties during a hurricane, tornado or earthquake. During violent weather when glass breaks, wind, rain and flying debris are given full access to your home or office, causing property damage and destruction. Security films are able to withstand extraordinary wind and force, helping to prevent entry of water and wind-borne debris, while providing superior protection 24-hours a day.

### Film Anchoring Systems:

Window film application will give some protection from a blast; however, the blanket of glass held together by the film will fly into the building at high speeds. Tint World® can install an anchoring system on the window film in the existing window frame to create a more secure environment for building occupants. Window anchoring is an attachment system that locks a thick 8 mils or 15 mils film onto the existing window frame as added protection from a blast occurrence.

Protect your most important investment: **Your home!**

## TINTING BENEFITS:

### Manage the Sun

Many homeowners experience difficulties with heating and cooling imbalances between sunny and shaded areas of the home. Window films minimize this imbalance problem and helps improve the average comfort level.

### Added Style & Privacy

Window films provide an increased measure of privacy. You can now avoid the glare and enjoy your view without feeling like you're on display to the outside world. You can also add style and personalization to your home through designer films.

### Secure & Protect

Our window films are specifically designed to help hold broken glass in place, lessening the chance of injury to your loved ones, and damage to your home's interior. It also inhibits intruders from making forced entry through windows.

## TESTMONIAL

*"Since getting my windows tinted, I've noticed my place is much cooler when coming home from work. This is especially great since the summer days are so hot, which used to make my place so stuffy. Thank you Tint World for making the process so easy."*

**Marissa  
Tavares**

Fort Lauderdale, FL

# COMMERCIAL WINDOW TINTING

WWW.TINTWORLD.COM

Tint World®'s Commercial Window Tinting can provide your business with so much more than privacy. Let Tint World® be your window solution source for protection, style, design, comfortability and more.

## Solar Control Window Films:

Tint World® solar window film installation helps conserve energy and decreases your company's carbon levels in compliance with environmental standards. Our window film solutions help your business consume less energy by maintaining stable and comfortable interior temperatures reducing heating costs in the winter, extreme air conditioning usage during hot summer months, cutting usage by 30-40% while greatly reducing harmful ultraviolet rays, glare and increasing privacy.

## Designer Window Films:

Designer films will add a new dimension to your office space and storefront. By using our computerized cutting technology, we can create custom designs to complement any décor. We can even cut your corporate logo into the film to create the look of high-end sandblasted glass art. With our spectrally selective window films, you can maintain high visibility and plenty of sunlight while protecting your merchandise and cooling your store. These films are ideal for retail stores because they provide a clear unobstructed view into the store during the day and at night. Merchandise is completely visible from outside the store. These revolutionary films let in the daylight and reject the sun's heat while blocking out 99.9% of the UV rays that destroy valuable merchandise.

## Safety & Security Films:

Today's buildings have a greater need for solar and safety film application due to the extensive usage of glass. Like an invisible shield, security films offer protection from broken glass when accidents occur at work. Tint World® safety and security window films also help prevent forced entry and crimes. Windows and doors are the most vulnerable parts of your business. They are points of entry for criminals and smash-and-grab thieves. When windows with security film are broken, glass remains intact; deterring "smash and grab" theft from getting in.

## Hurricane & Storm Films:

Glass is always one of the first casualties during a hurricane, tornado or earthquake. During violent weather when glass breaks, wind, rain and flying debris are given full access to your office building, causing property damage and destruction. Security films are able to withstand extraordinary wind and force, security film helps prevent entry of water and wind-borne debris, providing superior protection 24-hours a day.

## Architectural Finish Films:

With Tint World® architectural surface finish films, you won't need to replace the counter tops, flooring, doors, wall coverings, and hundreds of other hard surfaces in your buildings that have been scratched, stained, gone out of style, or are just showing their age. The environmentally friendly architectural films, can extend the life cycle of existing building stock, conserve resources, retain cultural resources, reduce waste, and allow the reuse of building products and materials to reduce demand for new materials. These films are ideal for both new construction and remodeling, and have a Tint World® and manufactures product warranty.

## Film Anchoring Systems:

Window film application will give some protection from a blast; however, the blanket of glass held together by the film will fly into the building at high speeds. Tint World® can install an anchoring system on the window film in the existing window frame to create a more secure environment for building occupants. Window anchoring is an attachment system that locks a thick 8 mils or 15 mils film onto the existing window frame as added protection from a blast occurrence.

Protect your most important investment: **Your business!**

## WINDOW GRAPHICS:

Maximize your visual impact and advertising message with Tint World®'s window and vinyl graphics. Tint World® can wrap your storefront with custom designed window graphic signage using perforated one way view vinyl materials. Our digital color printing is also perfect for signage, trade shows and events. We offer high-resolution printing on heavy-duty premium vinyl that produces stunning results with our photo quality, 6-color, solvent based inks.

## ANTI-GRAFFITI FILMS:

Protecting a glass store-front from vandalism is a high priority for business owners. Millions of dollars of glass damage are reported each year from graffiti alone. The cost of replacing windows on storefronts is too high for most business owners. Tint World®'s anti-graffiti film is thick, clear film that is applied onto the exterior of the glass and can be replaced at a fraction of the cost of a new windowpane. Our film has an advanced scratch resistant coating and can be cleaned with conventional glass cleaners. When a vandal scratches or uses acid etching chemicals to deface your windows, it won't be permanent. They are actually damaging the film, not the glass.

## TESTMONIAL

*"Two of our buildings had office windows where glare and heat were a particular problem for our workers. Tint World was able to come in and advise us on a solution and within a week, our windows were tinted. Thanks to you, our work environment is much more comfortable."*

**Darren Thompson**  
Cary, NC

# marine

## WINDOW TINTING

WWW.TINTWORLD.COM

Tint World®'s Marine Window Tinting is one of the best ways to improve the look and comfort of your marine craft. Cruise the waters in cool comfort by letting the installation experts at Tint World® help you with choosing the right film.

### Why Tint your Windows?

Today's boats utilize electronic on-board navigation equipment and other essential electronics. Tint World® offers the highest quality, non-metallic film in order to avoid the loss of signal strength. Our films will keep you and your passengers cool and comfortable with a clear view of the world outside, without interfering with essential electronics on board. Window films also cut down on potentially dangerous glare from the water, reflective surfaces and from other vessels glairing lights at night.

### Cool View Protection:

Tint World®'s window films offer cool view protection by providing a permanent barrier between your interior and the destructive effects of the sun. Marine and RV manufacturers are producing luxury and high-end vessels with higher grade interiors, so it has become increasingly crucial to protect these interiors from fading and cracking. Keeping the interior cooler will not only protect seats, carpets, vinyl and leather, but your air conditioner also won't have to work as hard, allowing you to save fuel and extending the life of your air conditioning system.

### Film Packages:

Tint World® offers variety of options for film packages; which all include different shades, features, benefits and warranties. If you're not sure which tint is right for you and your vessel, let one of our knowledgeable, friendly staff members help you decide on the look and priced tint that's right for you.

Professionally Installed Window Tinting...

Made Simple!

## MARINE STYLING CENTER:

Whether you are fishing, skiing, sailing or just cruising, you can count on Tint World® to make your time on the water more enjoyable. From window tinting and vinyl graphics to accessories and detailing, Tint World® can keep your watercraft in top condition.

### Services:

- Marine Window Tinting
- Marine Wraps & Graphics
- Marine Electronics
- Marine Accessories
- Marine Detailing & Reconditioning Services

## TESTMONIAL

*"My privacy tint was looking old and had some lifting in certain areas. I wanted a fresh look and heard about Tint World from a friend. Their onsite service and selection was great and the installers were real pros. The film looks flawless."*

## WINDOW TINTING

WWW.TINTWORLD.COM

Whatever you drive, Tint World® automotive window film can give your vehicle that sleek, custom, cool look - it's the investment that improves your driving experience and your vehicle's value!

### Computerized Film Cutting System:

Tint World® PRO-CUT state-of-the art "Computerized Film Cutting System" digitally generates and cuts film patterns to your vehicle manufactures specifications to ensure a perfect accurate installation every time, without risking damage to the glass and rubber seals. Tint World®s modern, ultra-clean studio-workshop facilities and Computer Cut Systems are designed exclusively for auto tinting applications and styling services.

### Cool Vehicle Protection:

Tint World®s window films offer cool vehicle protection by providing a permanent barrier between you and your vehicle's interior, and the destructive effects of the sun. Auto manufacturers are producing luxury and high-end cars with higher-grade leather and suede interiors, so it has become increasingly crucial to protect these interiors from fading and cracking. Keeping the interior cooler will not only protect your cars dashboard, seats, carpets, floor mats, vinyl and leather, but your air conditioner also won't have to work as hard, saving you fuel and lengthening the life of your air-conditioner. Additionally, window film cuts down on potentially dangerous glare from the road, reflective surfaces, your hood, and from other vehicles' headlights at night.

### Film Options:

Tint World® offers variety of options for film packages; which include different shades, features, benefits and warranties. We also offer colored tints that are available in: red, blue, green, yellow, and chrome.

### Custom Designs:

Window tint comes in a wide variety of designs, colors and style films that can be custom cut to match your wildest ideas. A custom window tint design can add a graphical element that fits your individual taste. Our computer cut system allows us to create intricate details from almost any design.

Computerized Film Cutting System...

100% Accurate!

## AUTOMOTIVE STYLING CENTER:

Tint World®'s Automotive Styling Center combines the use of great brands and unbelievable service for all of your styling needs. Whether you are looking to tint your windows, upgrade to custom wheels and tires, add premium sound, or increase security and protection with a top-of-the-line alarm system, Tint World® has you covered.

### Services:

# Own your own TINT WORLD® Franchise

The first Tint World® Center opened in Tamarac, Florida in 1982, which started a new segment in the automotive aftermarket. This new concept started with window tinting and soon after began offering auto security, car stereo systems, and wash and wax services through customer and market demand. As technology advanced, we expanded our product lines to include video systems, car and truck accessories, and appearance and convenience services to create a unique "Automotive Styling Center". Today, Tint World® has grown to a national franchise system of automotive styling centers with its headquarters in Boca Raton, Florida. Our automotive centers have actually performed services for three generations of family members; teenagers, their moms and dads, and their grandparents. Some customers that had their first car tinted at Tint World® over the last 25 years are now becoming Tint World® franchise owners today. As our history shows, we truly believe in long term relationships. In fact we've been fortunate enough to have serviced many of our clients each time they get a new vehicle and as they have moved into their second or third homes or business locations.

## TINT WORLD® ALSO OFFERS...

### Insurance Claim Service:

It's always difficult to file an insurance claim and take care of the proper paperwork. Tint World® can walk you through the whole process, starting with the basics about your deductible, finding repair and parts stores, and understanding the insurance company's terminology. Tint World® is here to answer all of your insurance questions.

### CARCO Inspection Services:

CARCO inspection locations provide automobile owners a pre-insurance inspection site at our Tint World® locations. Approximately two million vehicles require inspection each year in the territories CARCO covers.

### Rental Scheduler:

Tint World® can provide you car rental services through Enterprise Rent-A-Car and Hertz. We offer free and discounted car rental to make your repair experience with Tint World® much easier. The staff at Enterprise and Hertz is always friendly and helpful, and they are happy to drop off a rental car for you at our center and pick it up when your vehicle is finished.

### Lease or Trade-In Return Inspections:

Tint World® can provide you with a pre-inspection service for your lease or trade-in vehicle. Save money with Tint World®'s pre-inspection and repair services and return your vehicle with peace of mind.

### Commercial Accounts:

Tint World® Valet Service offers a competitive edge to car dealers, shopping centers, repair facilities, and body shops in offering aftermarket services and is the #1 choice in the areas that we serve. Our extensive one-on-one working relationship with the sales department, service managers, service writers and fleet departments, make it easy and profitable for any dealership to benefit from our services.
