iPlayCO About Us

At iPlayCO, we welcome the opportunity to build new relationships and introduce our clients to the amazing industry of children's play structures.

We are a worldwide authority in the custom design and manufacturing of indoor play areas as well as theming for toddlers, school-age children and young adults. We offer a unique approach in providing progressive, imaginative and educational play systems and theming to family friendly businesses, organizations and institutions. Whether you're looking to entertain, educate or transform a space with innovative visual appeal, our experienced team of professionals will provide you with the best solution for your specific need.

Since 1999, iPlayCO has provided creative, soft playground systems to family entertainment centers, restaurants, churches, retail shopping centers, children's museums, zoos/aquariums, resort hotels, children's hospitals, dental offices, fitness facilities, recreation centers, municipalities and other not for profit organizations.

Indoor Playgrounds

COLORFUL SAFE AND READY FOR FUN

Playgrounds are modular play structures for children and may be customized for each single activity and module. Consultation and design are prerequisites necessary for making a perfect playground for any environment. Our team of experts are available to satisfy your project's needs and to create a structure that is functional and full of fun activities. Play structures have always been our primary business and since 1999 we have learned to understand how kids play. We design playgrounds from a few different perspectives, all equally as important.

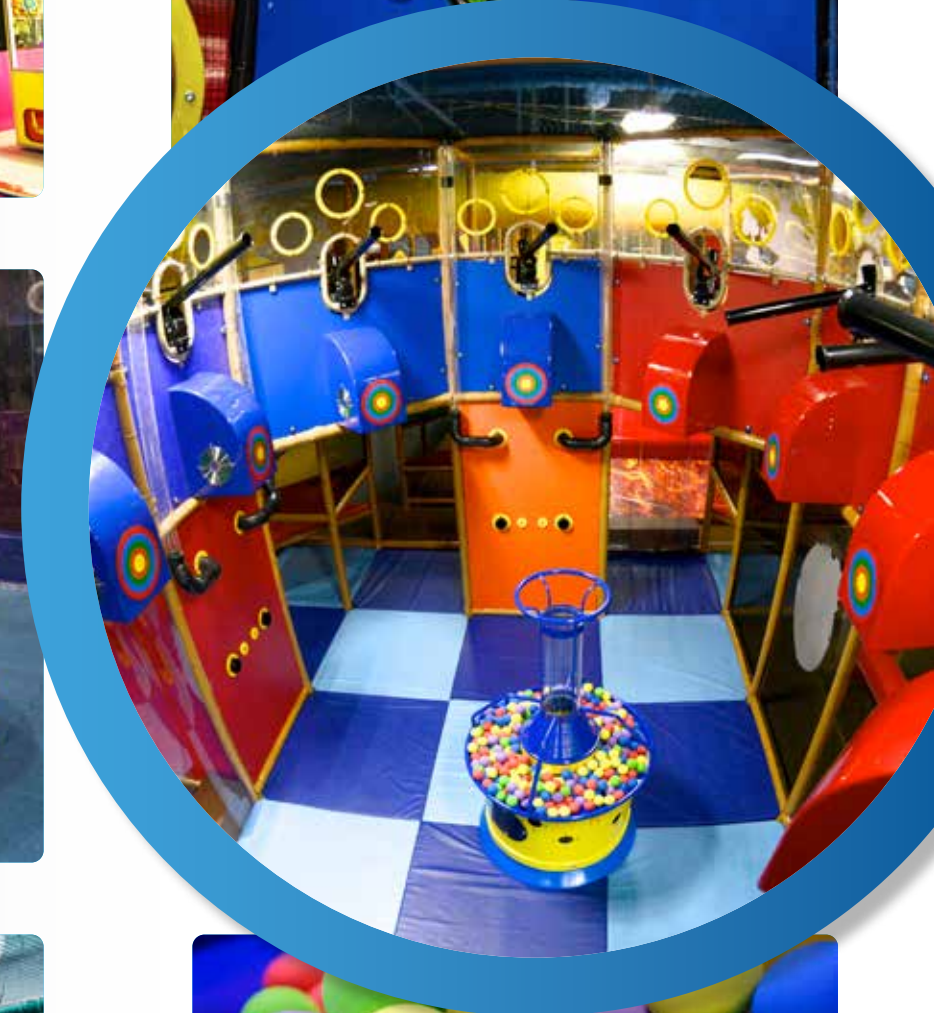

Ballistics

SAFELY SHOOT FOAM BALLS IN A SAFE AREA

In addition to our exclusive playgrounds, we have a large range of interactive play attractions for children of all ages. By combining lights, sound, and motion with our "Ballistic Ball Shooters" we create an interactive arena for all ages. Children to adults participate in a variety of challenging games that encourage activity, cooperation, and friendly competition.

We offer both the individual forced air based ballistics system/arena and the compressor powered pneumatic set-up. Our ballistics arenas are all custom designed and can include multiple levels, targets, ball fountains, ball dumps, ball movers, etc.

Toddler Play Solutions

FUN AND SAFE FOR YOUNG CHILDREN

Soft contained play areas are a great way of providing fun and creative play areas for young toddlers; a vital part of a young child's development. Well designed and manufactured soft indoor play areas will facilitate the development of a child's physical, intellectual and social skills in a safe, pleasant environment. Play areas can include stimulating activities, play panels, interactive events and "Soft Stuff" like foam animal rockers.

My Town

PROMOTE LEARNING THROUGH ROLE PLAY

My Town is an exciting, new interactive edutainment experience that promotes occupational role playing for children through structured programs in "child-sized" businesses and buildings that are familiar to every community.

My Town™ is a child sized city that is created to include familiar businesses and buildings within their communities. My Town™ promotes hands-on experimental role playing for children to learn how people live and work together to create a city that thrives.

TAG Interactive Arenas

WHAT IS A TAGACTIVE ARENA?

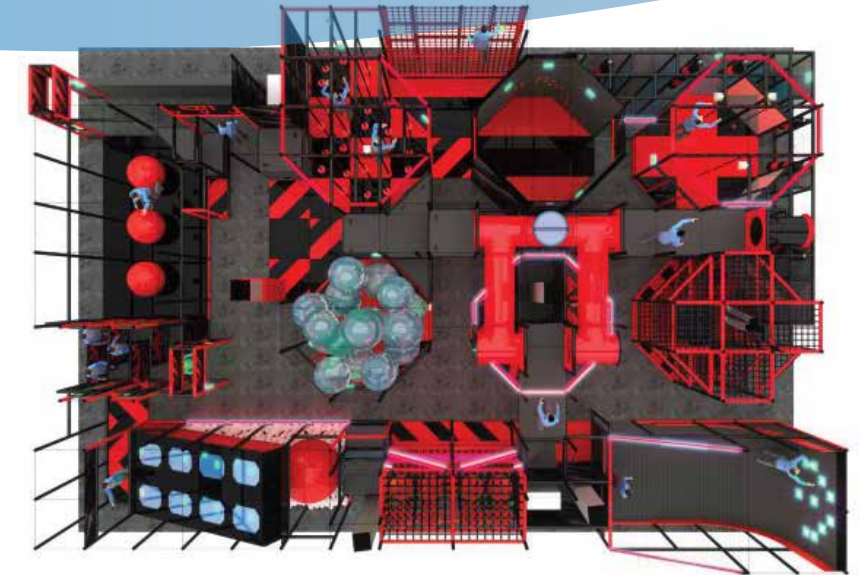

An arena based game designed to test strategy, speed, agility, awareness and bravery. TAGactive promotes fitness, fun and competition. The arena itself contains a complicated structure of inter-connected activity areas.

The arena is split into separated zones, permitting enhanced player distribution and capacity management. Hidden throughout the arena and within the activities are a large number of illuminated TAGs. The TAGs are controlled via a central computer system and glow in different colors corresponding to a pre-determined points system. Points are collected by players using a sensor worn as a wristband. When a wristband is located onto a TAG's light source, a points value is allocated to the specific player's wristband. Arenas can be designed to suit available spaces and required capacities.

TAG Arena Option 1

Capacity: 70 Players
Unique Events: 16
Transponders: 120
SQ/M: 345
Height Required: 5.5m
Zones: 1 Zone
Scoreboards: 3
Admin Computers: 2

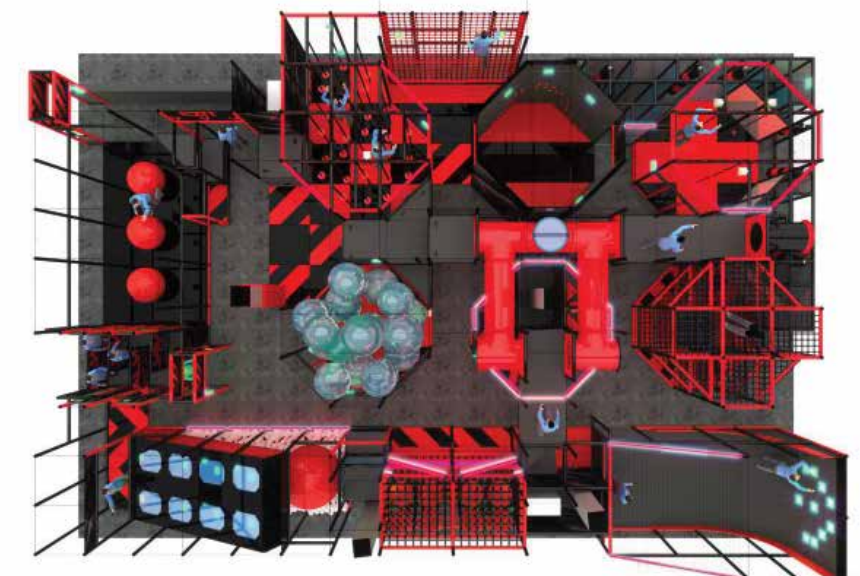

TAG Arena Option 2

Capacity: 90 Players
Unique Events: 21
Transponders: 160
SQ/M: 432
Height Required: 8m
Zones: 1 Zone
Briefing Area
Reception Desk
2 Cyber Towers
Scoreboards: 4

Ninja Courses

Ninja Courses are arguably the best source of additional revenue for your family entertainment facility. From trampoline parks to amusement centers worldwide, ninja warrior courses offer a physical challenge and competitive fun for warriors of all ages. Ninja Course builders have accepted the challenge of designing the most engaging course layout to receive the highest repeat play appeal while keeping the footprint small and cost down for maximum return on your investment.

Separate yourself from the ordinary warehouse full of trampolines and step into the world of family entertainment. We offer attractions that allow you to diversify your park and give your guests a better experience than all your competitors.

In addition, we can provide exciting interactives such as Skypod and Dodge Attack trampoline powered immersive video games and Sound and light activities like the Prismatic explosion.

Climbing Walls

All of our Climbing Walls are custom designed for your installation. Attract and inspire climbers of all ages and abilities to leave their comfort zone to try something new.

Trampolines

THE CABLE DEFLECTION TRAMPOLINE SYSTEMS

Iplayco and the Iplayco group of companies are proud to introduce the newest unique and patented product in our line. These Trampoline system designs are based on the patented Cable Deflection Systems. An industry leading design concept provides less stress on the users feet, ankles, hips and legs, creating safe playing environments for trampoline enthusiasts.

SO WHAT IS A CABLE DEFLECTION TRAMPOLINE?

Developed by a leader in the commercial trampoline industry, the cable deflection dramatically reduces unnecessary impact to users while giving the best bounce of any commercial trampoline, providing an experience much more enjoyable than rigid frame trampolines found in most trampoline parks. It is durable, low maintenance, cost effective, and comes powder-coated in the color of your choice at no additional charge.

ADVANTAGES OF CABLE DEFLECTION SYSTEM VS. RIGID STEEL FRAMES

- Reduces impact transferred to hips and joints
- Lower maintenance costs
- Dramatic reduction in mat and spring replacement costs
- Adjustable bed tension
- Highly durable

PRISMATIC EXPLOSION

Looking for something new to add to your trampoline park? Here it is. An interactive attraction that uses absolutely no additional space while increasing your revenue. The state-of-the-art system is the first of its kind, and revolutionized the trampoline industry. Keep your jumpers engaged with various games, synchronized lighting, and music. Interactive jump sessions and games allow for an overall safer and more exciting experience to reach your customers.

Sport Courts

Air Trek

COURSES THAT CHALLENGE YOUR NERVES

Air Trek is one of the leading activities which attracts lots of customers, as it is challenging and even fun to watch. Guests are harnessed and walk the tightrope or skip across the spinning bridge without a safety net so it is a test of nerves as well as skills.

Complete FEC Development

LOOKING FOR A TURN-KEY SOLUTION?

FEC Builders is part of iPlayCO Group of Companies. We create and deliver full Turnkey solutions to our customers. Our expertise is more than 20 years creating and delivering successful business projects and solutions. We work closely with our customers. Each solution is customized and tailored to meet our customer's needs. We do believe that the key for a successful business is the collaboration between our team and our customers.

iPlayCO offers a vast turn-key service that covers the business plan review, financing, operations, design, training, and marketing. By mixing interactivity and theming as well as putting an equal importance of creativity and aesthetics, iPlayCO has earned a loyal customer base. Our products can be found in more than 70 countries around the world.

"We take care of the whole thing." - Scott Forbes - President/CEO/Director of iPlayCO

Safety

Our play structures meet or exceed all standards set forth by the American Society for Testing and Materials (ASTM) and we are a member in good standing with the International Playground Equipment Manufacturing Association (IPEMA). We also comply with TUV America, Standard Safety Performance Specifications for Soft Contained Play Equipment (F1918-98), European Committee for Standardization (CEN), Consumer Product Safety Commission Guidelines, Royal Society for the Prevention of Accidents (RoSPA), and Canadian Parks and Recreation Association (CPRA) guidelines for playground safety. The equipment included in all iPlayCO designs has been developed and tested for all flame and smoke spread ratings and is extremely rugged and durable to meet a variety of usage conditions. We are proud of our safety record, and we have CPRA Certified Safety Inspectors on staff.
