

# WHY FREEFALL?

- **We were born to jump!** From backyard trampolines to bucket list skydives, curiosity calls us to explore new limits, new heights, and new experiences in search of what makes us feel alive!
- **Offer a bold, eye-catching thrill** as a standalone or add-on experience at a fraction of the price to your customer as a skydive or bungee jump!
- **Create a grand exit off your zip or adventure course** that your customers will never forget.
- **Did we mention the ROI ?**

## BRINGING FREE FALL TO THE MASSES.

FLIGHT  SERIES

## A MAGNETIC PARACHUTE?

*Head Rush* is the first company to bring magnetic, eddy current braking technology from trains, elevators, and roller coasters into the extreme adventure industry, enabling an exciting jump without the need for parachutes, crane rentals, or long reset times.

### What Are The Advantages?

The compact nature of magnetic braking technology enables you to install a high throughput, free fall experience that is financially accessible to you and your customers. Eddy current technology creates a reliable, soft, and smooth descent, and unlike fan descenders, allows for "true free fall" up to 11 m (36 ft) before lowering.

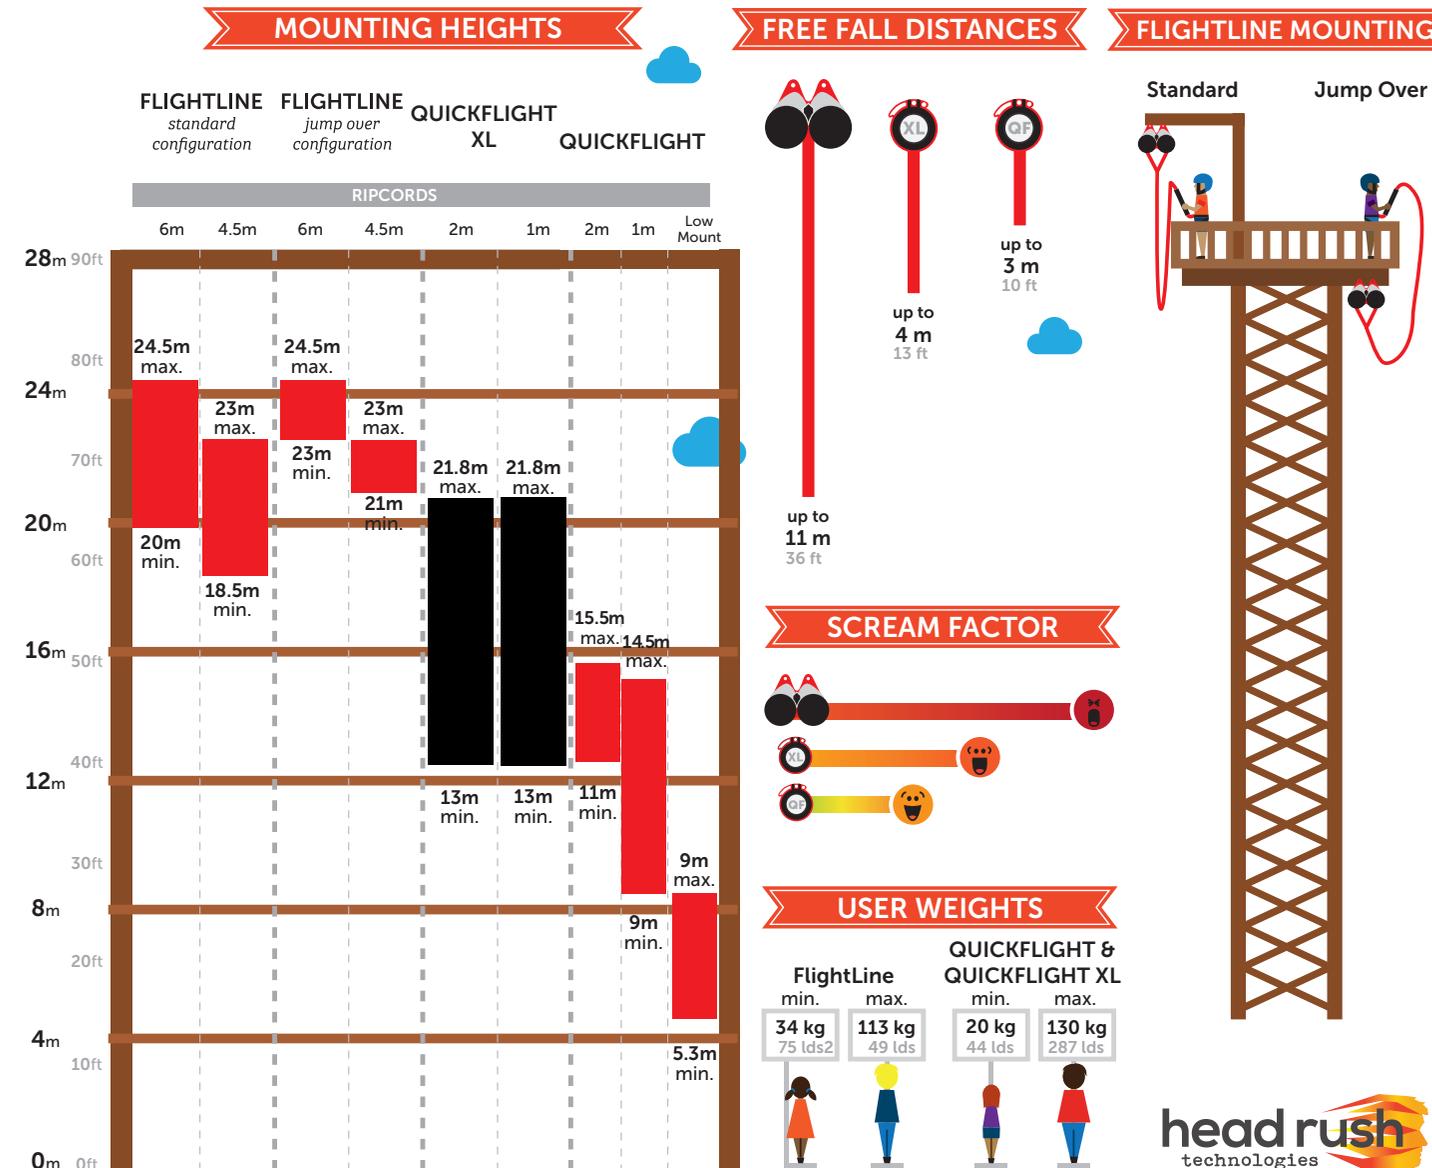

The Perfect Course Exit or Stand-Alone Thrill. Great for Families and Kids!

- Peace of Mind**  
 Designed specifically for the adventure industry, QuickFlight features a first of its kind Dual Line System, two connectors, and an Overload Protection Assembly for maximum rider comfort.
- Operational Compatibility**  
 Highly versatile, QuickFlight supports a wide range of participant weights and mounting heights for easy retrofit onto your existing structure. Field serviceability of parts ensures it's plug and play!

QuickFlight is now CE Certified and Third Party tested for both descent and climbing! Tested to 10x EN341:2011 Class A, it's never been easier to add Free Fall to your course.

# FREE FALL GUIDE

## CHOOSE THE FREE FALL DEVICE FOR YOU

Calling All Adrenaline Junkies. Imagine a BASE Jump, Without the Parachute!

- The King of Free fall Devices**  
 Unique technology allows FlightLine to offer the longest "true free fall" in the industry!
- Jump Over or Jump Under**  
 Flexible mounting options allow for a standard overhead mount or a more epic "jump over" configuration. More operator serviceability and install-ability means you'll save on ownership costs throughout its lifetime.
- Extreme ROI**  
 The industry proves that jump height is directly related to price willing to be paid per jump. With a low cost to own, a wide range of mounting heights, and high throughput, watch your customers free fall while your profits skyrocket!
