## KART1 DISTRIBUTION HISTORY

# ABOUT THE COMPANY

Kart 1 is the exclusive worldwide distributor of **OTL** electric go-karts, the most popular electric concession kart in the world. We specialize in providing the majority of the products needed for a concession karting facility or family entertainment center. In addition to the karts, we also distribute **PROTEX** karting barriers, chargers, **SAKAMOTO** tires, timing systems, helmets, flags, trophies, medals and more.

Since 2002, Kart1 Distribution has distributed OTL karts to over 160+ plus karting centers worldwide. Some of our largest customers include K1 Speed, Autobahn Indoor Speedway, Urban Air, iKart, RPM Raceway, Pole Position Raceway, Veloce Indoor Speedway, and many more. Many of our customers have opened multiple locations, for example, K1 Speed has 50+ locations, Autobahn has 9 locations and Urban Air has 4 locations, with many more to come. Our customers are using OTL karts in over 25+ countries including the United States, Canada, Mexico, Australia, New Zealand, China, Russia, Korea, Italy, France, Finland, Netherlands and many more.

We believe in creating long-term partnerships with our customers so that we can continue to support you long after the first purchase of karts. After the initial purchase, we will travel to your location and assist with the setup of the karts and the installation of the Protex barriers. We have large warehouses around the world where we keep stock of all the spare parts and accessories you need. Thanks to our large inventory we always ship orders the very same day. We also have expert technicians who are always available by phone or email to support you with any issues or questions that may arise. We hope that we will have the opportunity to serve and support your karting center!

KART1 DISTRIBUTION  
GO KARTS

# OTL KARTS IS THE WORLD LEADER AND INNOVATOR OF ELECTRIC KARTS SINCE 1996.

Founded in Italy in 1996, OTL ElectroKart has been manufacturing only 100% electric karts for over 25 years. Each kart is carefully designed, engineered and manufactured for the Entertainment, Rental, and Racing business. Our kart manufacturing combines the latest technologies with the hand-built quality and durability of Italian artisans. Not only are these karts aesthetically pleasing, they are available with either lead or lithium batteries for customers seeking serious performance at all price points.

## KART MODELS SUPERLEGGERO

The OTL Superleggero kart is the undisputed industry leader of electric go karts for rental fleets. With its sleek modern design, outstanding performance and reliability, OTL has set the standard for the karting industry. With a top speed of up to 45 mph and a rear differential to help control the speed, these karts have been thoroughly tested and revised through more than 25 years of experience. OTL electric karts are currently in use at over 100 tracks in the United States and 200 tracks worldwide.

## KART MODELS

# OTL JUNIOR

The OTL Junior Kart is the perfect complement to the Adult Superleggero Kart. The Junior kart allows you to appeal to a much larger market. In fact, for many customers it accounts for around 30% of their business which is why almost all of our customers have Adult Karts and Junior Karts. Now you can appeal to kids birthday parties, junior racing leagues and be a one-stop-shop for the entire family. As with the adult kart, safety is critical and thus it has many of the same safety features. The minimum height recommendation is 48" which typically corresponds to children aged 7 to 8. Many of the kids use the Junior Kart as a stepping stone the Adult Superleggero Kart creating long lasting customers.

## KART MODELS STORM DUO

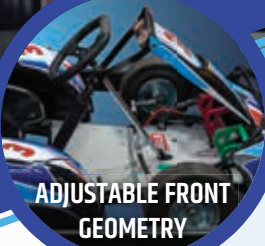

The OTL Storm Duo kart creates more excitement at your track for a wider customer base. Parents can drive with their kids, instructors can teach students, you create equitable accessibility for underserved customers, or just have fun with the side-by-side experience. The Storm Duo features the same 45-mph powertrain as the Superleggero kart allowing families of all ages to race together without having to slow down your business!

The Storm Duo is perfect for family outings, training academies and teambuilding events to help expand your market even further.

**FAMILY ENTERTAINMENT CENTER

## KART MODELS EGK

The EGK is perfect for family fun and multi-activity centers. This kart accommodates teenagers and adults 52" and taller. Priced to be our most affordable Adult option, this vehicle still offers exceptional performance with a top speed of 40 mph. Designed for the rigors of Concession Karting, this vehicle features an adjustable seating position, exterior Stop button and reverse functionality all packaged in an easy-to-maintain design.

When paired with the EGK DUO, you can provide fun for groups big or small without the hassle of trying to coordinate which row of karts goes out next.

## KART MODELS

# EGK DUO

The EGK Duo is the newest kart designed for the Entertainment and Concession markets. Featuring a modern aesthetic and design just 6" (15cm) wider than the EGK, this 2-Seat kart is perfect for locations that want to let parents and kids race together without compromise.

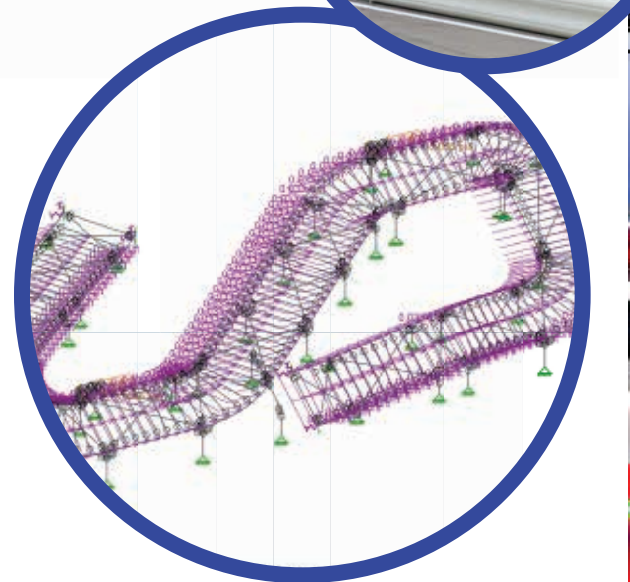

The EGK Duo offers a padded headrest, rubber bumper on the steering wheel and enhanced passenger foot protection creating a care-free driving experience. Like all of our karts, maintenance has been designed to be quick and easy to keep your karts on track.

# KART1 DISTRIBUTION BARRIERS

## COMPUTATION AND EXECUTION PLANNING & ENGINEERING

Our Protex team members use CAD software to help visualize your dream from 20,000 to 200,000+ sqft. We can render in your colors providing you with images of what your track will look like when completed without the need for a hefty deposit. This also allows us to cost out your build with precision for a truly Turn-Key solution.

**PROTEX**  
KARTING BARRIER

HIGHEST QUALITY  
KARTING BARRIERS

## TRACK DESIGN & PROTECTIVE BARRIERS

**PROTEX KARTING BARRIERS** have no sharp edges and are made of high-density polyethylene making it flexible and elastic while impact resistant at the same time. These barriers can be manufactured in different lengths, sizes and colors creating continuous and flexible protection against impacts.

Track designs by Protex Barriers features a fun and flowing driving line on Single and Multi-Level tracks. Each track is custom-designed to fit your space with a variety of corner shapes and an emphasis on safety to challenge your customers and calm your insurance company.

# KART1 DISTRIBUTION MULTI-LEVEL TRACKS

## MULTI-LEVEL ELEVATION BARRIERS

Multi-Level tracks make a small building big, jaws hit the floor and revenues soar. With more than 10 years of track design experience, you can rest assured knowing that your layout won't feel like a theme park ride and challenge drivers for years to come.

Our proprietary ramps and structures blend simplicity with strength to create an elegant yet modular design that can be reused rather than remanufactured when a track is redesigned. Protex Barriers maintain their impact-absorbing abilities on elevated sections of the track and can be color-matched to your business's colors to create a truly one-of-a-kind driving experience.

## DURABILITY TO RESIST ELEMENTS INDOOR & OUTDOOR

Our barriers are manufactured to withstand the elements some outdoor installations approaching 20 years in weather conditions ranging from severe heat to heavy snow. Our patented design and polymer construction is virtually unbreakable and will provide you with years of service.

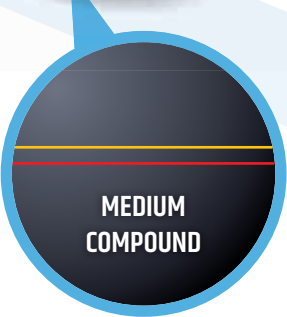

## MOOD LIGHTING LED LIGHTS

Protex Barriers have the option for LED lighting on the barriers and hand rails designed to provide an extra “Pop” of color late into the night. LED strips come in a variety of colors and patterns controlled wirelessly to provide increased vision for racers or mood lighting for the track area.

# KART1 DISTRIBUTION TIRES

## SAKAMOTO TIRES HIGH PERFORMANCE TIRES

Developed in 2010 by ex-professional kart racers, Sakamoto Tires has become the reference in the rental karting industry.

Our tires have been in use by many tracks for over 10 years. During this time, we have listened to the feedback from our customers in order to improve and refine our product lineup. Sakamoto Tires are designed to balance high performance at a cost-effective price point with a long lifespan allowing your customers to have the best lap at a fraction of the price.

## CONCESSION GO KART TIRES

# DURABLE PERFORMANCE

Sakamoto Concession tires are designed with a hard-rubber compound and inner tube to provide a durable lifespan with grip in mind. The hard sidewall construction creates a consistent driving experience through turns and down the straights without sacrificing overall ride quality.
