**PROTEX**  
KARTING BARRIER

**The PROTEX Karting Barrier is the most trusted and reliable shock absorbing barrier system in the world!**

With its patented shock absorbing system, the PROTEX Karting Barrier is the only karting barrier system to return to its original position after an impact. PROTEX is widely used around the world from outdoor gas tracks to indoor electric karting facilities. The durability and safety of the system is truly our strong point!

## UNDEFORMABLE

The only barrier in the world that automatically returns to its initial position after an impact.

## STYLISH AND FUNCTIONAL

Spectacular aesthetics with a variety of colors and LED lighting options. Suitable for both indoor and outdoor tracks.

## SIMPLE INSTALLATION

Easy installation makes planning and future maintenance a breeze. The barrier system is composed of less than 5 individual parts.

## MAXIMUM PROTECTION

Other barrier systems may harm drivers after impact. The PROTEX Karting Barrier is designed to absorb impact with its patented spring components.

## ENDLESS SAVINGS

PROTEX Karting Barrier creates profitability, savings in personnel and time, increased kart lifespan, and reduction in insurance costs.

## COMPACT

The barrier occupies less space than any other barrier system and has a high impact absorbing capability.

# SERVICES

PROTEX and Kart1 offer a full range of services from start to finish for your entire Karting Project.

With just a blank building layout, we can assist in designing your dream karting track. Not only will we design, build, and commission your track, we also can support your track worldwide with spare parts and service.

- Always complementary track designs
- North America, Europe, and Asia spare part support
- 24/7 and 365 days support and consultation

## Multi-Level Solutions

PROTEX offers an innovative, modular Multilevel solution designed for space and cost savings!

Our Multilevel solutions are unique, patented steel modular structures that can be configured in endless options. These steel structures are specifically designed to work with karting applications.

- Non-permanent structures can be moved if you ever decide to change the track or location, Your race never stops!
- Designed specifically for the karting industry to reduce damage to the karts.
- Completely customizable colors and designs
