

**Maintenance Excellence in
Rides Operations Management**

Digital procedures

Go paperless and automate all maintenance reports even in the field through the use of mobile devices in online (wifi/4G) and offline mode.

Technician Management

Manage and track in real time any operations of internal or external technicians. Plus preload on smartphone all documents required for effective on-site task (diagrams, manuals, spare parts...).

History and analysis

Store and organise all information in a single Data Base to safeguard your document heritage. Use the history to carry out analyses and optimise company performance.

"Finally, on my smartphone, I have access to all maintenance documents and procedures."

Lorenzo,
Safety technician

Performance under control

Plan, Execute and Monitor your activities and maintenance via Web application from any location to realise your objectives.

"I only need one click to keep track of rides status and handle interventions easily."

Andrea,
Safety technician

Connect your rides

Archive and organise all information in a single database to safeguard your document heritage. Use the history to carry out analyses and optimise company performance.

From ticket to automatic report

Open a ticket, follow its evolution in the workplace, track its closure in the field and generate the automatic report in one single integrated cycle.

with custom-made web app

Management of Interventions and Scheduled Maintenance

Opera manages the maintenance of your installations through an activity planning interface. The data are all monitored in real time and historicised.

Management of ticket requests

From the assistance request by ticket creation to on-site intervention resolution and client signature, everything is safely stored. Keep track of hours, costs, and spare parts for management.

Document Management and Checklist

Designed to create, store and consult via web and mobile all types of documents (checklists, manuals, drawings, video procedures, media content).

Real-Time Ride Status

A combination of proprietary hardware and software allows Opera to connect to remote control systems and generate alarms based on actual working hours.

Report Management EN/ISO compliant

Opera pre-sets and automatically fills in the ride logbooks according to the applicable legal standards, extracting data from field activities.

Wireless Sensor Network

With the Remorides Sensor Network (RSN), Opera extends the monitoring of rides by collecting data from various types of sensors.

Spare Parts Management

All spare parts information is classified and available for consultation via web or mobile app through a simple and intuitive interface.

Team Collaboration

Opera facilitates collaboration among technical teams and knowledge sharing through an internal social communication platform.

real time,
real team,

real benefits.

Go paperless

harness the potential of new handheld device to achieve complete digitisation of processes, saving paper and valuable time.

Opera allows you to integrate any type of technical and administrative document according to legal standards and specific industry requirements.

"With a simple click you can upload and create the complete ride logbook containing all essential info and ready to be handed over in case of inspections by third parties".

Increase efficiency

simplify maintenance procedures and guide your team to rapid problem solving during the execution of activities on site.

Opera manages all critical information and secured with encryption and backed up on our cloud space or on its own server

"Data is your knowledge; it manages your assets over time and serves as your safeguard in any legal dispute. An automatic and secure backup ensures peace of mind".

Secure your future

keep track of any activity performed through the use of automated procedures and safeguard yourself against legal ramifications in instances of mandatory actions.

Optimize maintenance operation,

communicate and share knowledge with your team through push notifications, use a single real-time control panel, create customized reports with tailored KPIs, and much more...

Advanced Amusement Park Maintenance: Fusing Human Insight with Digital Precision

REMORIDES is an innovative company founded in 2013 by the union of two senior engineers from different backgrounds and fields.

General Manager Eng. Mario Savini, comes from a long experience in international companies dedicated to mission critical software (biomedical) and in the field of industrial automation.

The Research and Development Manager, Eng. Marco Begotti, holds extensive experience in design and construction of Plants particularly in the energy and amusement field.

Since 2023, **Remorides**, now operating under the guidance of **Tesar S.p.A.**, has become part of **Dylog Group**, a top player in Italy's IT sector. Today, a dedicated team of engineers is tirelessly working on the development of our system, while numerous experts from diverse fields such as Facilities, Amusement, and Industrial Automation have joined forces. Together, they are enhancing Opera platform to be increasingly powerful yet always user-friendly.
