

THE COMPLETE MANAGEMENT SOLUTION FOR YOUR BUSINESS

Sacoa[®]
CASHLESS SYSTEM

OVERVIEW

Sacoa Entertainment has been the leading FEC operator in Argentina since 1957, owning more than 30 locations and with over 2300 debit card systems installed worldwide. The company is recognized as the global leader in Cashless Management Systems for the amusement entertainment and leisure industries.

Sacoa Cashless System was the first to use read-only magnetic stripe cards in the 90's to operate without cash for better revenue control in all areas of your business.

The System gives operators the flexibility to price games and attractions using multi-level pricing, build customer loyalty and significantly increase revenues getting further benefits impossible to achieve by traditional means or other card systems.

Almost every feature that is now considered standard requirement today for any debit card system was originally invented and developed by Sacoa, such as VIP pricing, timecards, multiple price levels, wireless connectivity, etc.

SACOA POS & MOBILE POS

QRPLAY Model

SACOA PAY

- Allows guests to use their smartphone as a playcard, to pay and play, by recharging their account either at the POS, Kiosk or Online.

MOBILE APP

- Native Android/iOS app available on Play/Apple Store, branded with your company's own name and look & feel.
- Allows registered guests to check playcard balance, purchase special offers paying online with credit card and accumulate reward points.
- Features store details including map location, direct phone number dialing, website link, online party booking access, and also includes push notifications ability to keep your customers always updated with your latest offers and news!

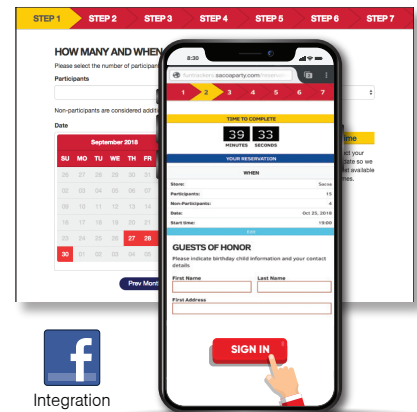

CRM

- Our cloud-based CRM module allows guests to sign-up to check playcard balance online.
- Registration process can be triggered at the Sacoa Kiosk, (or optionally at Sacoa POS Station) and later completed by customers online.
- Prompt to enter e-mail address when purchasing or recharging playcards engages the customer to do so at the very moment when the playing experience takes place.
- Built-in newsletters mailing engine allows managing custom-tailored marketing campaigns, which may be integrated with existing Mailchimp/Sendgrid accounts for massive mailing.

ONLINE PARTY BOOKING MODULE

- Features multiple store selection, availability, party packages, food and gifts, online payment, and everything needed to manage party reservations.
- Possibility of booking, scheduling and managing events by date and time for any number of rooms at the location.
- Optionally, packages may include various entitlements: time, money (credits), or passports for specific attractions or games.
- Allows bulk card activation for one event simultaneously.
- Integration with Facebook within a fan page, which allows users to complete all steps for making a reservation straight from their Facebook accounts.

Integration

REDEMPTION COUNTER AND INVENTORY CONTROL SYSTEM

- Hi speed operation with multiple items per transaction.
- Capable of interfacing directly with ticket-eaters and ticket weighing stations or reading vouchers from popular models like Deltronics, Smart & Benchmark.
- Multi-site and multiple storeroom capable.
- DPL (Digital Packing list) import and automatic DPO (Digital Purchase order) creation for all articles below set minimum in most popular standard formats.
- Inventory items cataloged by category/sub-category with labeling capability.
- Full audit and accounting both by location and consolidated.
- Comprehensive inventory report showing purchases, returns, redeems, etc by storeroom and item for selected date ranges.
