MILITARY

Designed and engineered to perform in the most demanding situations, RAM® Mounts have long met rigorous military standards. The RAM® mounting system features nitrile rubber balls that are ten times the grade of tire rubber, helping to isolate shock and vibration that's harmful to electronics. And with near-infinite adjustability, it's no wonder RAM® is trusted in military vehicles including MRAPs, HMMWWs, APCs, submarines, and more.

HEAVY DUTY COMPUTER MOUNTS

FEATURES

- Rubber ball absorbs impact, providing shock and vibration damping in the most extreme environments
- Double socket arms can be adjusted with the turn of a knob to achieve the ideal viewing and operating angle
- Marine-grade aluminum and high-strength composite materials reduce slip on rubber balls
- Mounting components backed by lifetime warranty
