MSc IN BLOCKCHAIN AND DIGITAL CURRENCY

The first and leading university Master degree in the world focused on Blockchain & Digital Currency

Duration:	3 semesters or 18 months
Mode of study:	Distance Learning/Online
Language of instruction:	English
Intake:	Spring & Fall
ECTS credits:	90 (9 modules)

The MSc programme is designed to help financial services and business professionals, entrepreneurs, government officials & public administrators better understand the technical underpinnings of

Cryptocurrencies and Blockchain technology, how it will likely interact with existing monetary and financial systems, and what opportunities exist for innovation in digital currency systems.

MSc IN METaverse

The world's first university Master degree in Metaverse

Duration:	3 semesters or 12 months
Mode of study:	Distance Learning/Online
Language of instruction:	English
Intake:	Fall
ECTS credits:	90 (9 modules)

The MSc in Metaverse is an interdisciplinary programme focused on preparing creators, developers, architects, financial professionals, policy makers for careers in metaverse design and management.

The programme is designed to help students explore the relationship between Metaverse technologies and their applications, providing new insights into the design and development.
