

PERSONAL SAFETY ROOMS BY

# Gold Medal Safety Padding

**Gold Medal Safety Padding** has been used for Personal Safety Rooms in the United States and around the world for the past 40 years and is the preferred product in all new facilities. It is specified by name and used extensively throughout **Police, Correctional and Medical Institutions** for the safe keeping of those persons who, through drug or behavioural problems are assessed to be at risk of causing harm to themselves, others or be destructive to their surroundings.

Importantly it also improves the security and safety for carers through separation, or if through intervention reduces the likelihood of injury.

**Gold Medal Safety Padding** is a specially compounded synthetic resinous material, which is poured onto a strand board and once cured, is sectioned into 2.44 x 1.22 metre sheets.

The wall panels incorporate two compositions with the bottom layer providing the softer component allowing compression and the top layer providing the strength and protection against serious damage.

The floor pads are manufactured to ensure protection is still provided but can be manufactured to suit a number of different situations. Seams and fixing holes are filled with a resin compound and once cured are sanded and painted with Gold Medal top coat. This provides a virtually seamless finished surface.

**Gold Medal Safety Padding** is highly resilient and has a smooth no slip surface, is completely fungus resistant, water resilient and easily cleaned.

**Gold Medal Safety Padding** can be adapted to fit any style of room. Standard or spilt doors, cameras, intercoms, waste grilles or sprinkler outlets, can all be incorporated within this product.

For those areas that require minimal protection **Gold Medal Safety Padding** can be applied to floors or beds only.

Throughout the world we have thousands of reference points and local agents who can assist with your requirements. Please contact us for further information.

**Thank you for your interest in Gold Medal Safety Padding.**

## PERSONAL SAFETY ROOMS

- Good looking, hard wearing, low maintenance,
- Long lasting, resilient, moisture resistant, fire resistant
