RIOT CONTROL VEHICLES

RIOT CONTROL VEHICLES

BAT presents a complete line of highly effective Riot Control Vehicles based on over 40 years of expertise in specialized vehicle design and production. These rugged vehicles include the latest in water cannon technology based on the advanced computer – controlled **JET PULSE SYSTEM**. Highly accurate **non-lethal** pulse firing can be performed in three different modes:

- ▶ Short pulse
- ▶ Long Pulse
- ▶ Continuous Stream

The advanced command control allows the operator to mix accurate amounts of additives such as tear gas (CS) or dye to the water pulses according to operational need.

BAT Riot Control Vehicles are fully protected to perform any demanding task with the following features:

- ▶ Foam nozzles protect the bottom section from fire.
- ▶ On-deck water and foam nozzles protect against fire.
- ▶ Gas nozzles protect the outer structure from approaching rioters.
- ▶ Filtration System for the driver's/crew cabin.
- ▶ Water sprayers for windshield and side windows.
- ▶ Hefty front bulldozer blade clears any obstacle in the vehicle's path.
- ▶ Front C.C.T.V. and Video System.
- ▶ Rear camera & Monitor for rear viewing.
- ▶ Complete ballistic protection for varying threat levels (available as an option).
- ▶ Run-Flat-Tire (R.F.T.).
- ▶ Protection mesh for windows, windshield, lights, etc.

BAT vehicles are built on a variety of chassis sizes with a wide range of optional accessories and equipment groupings such as:

- Portable acoustic device
- Non-Lethal Tube Launched Munitions System

All models are provided with a complete package of detailed documentation which includes: operating and maintenance manuals, extensive training sessions, spare parts lists and warranties, all backed by a firm commitment for a peak level of after-sales servicing.

BAT produces a complete line of over 15 distinct model types of Riot Control Vehicles, all custom-built per customer specifications and under the highest standard of quality.

The **BAT** Riot Control Vehicle is cost effective and is produced under the scrutiny of ISO 9001(2008).

BAT products are in use extensively worldwide and have proven experience in intensive action.

Beit-Alfa Technologies Ltd. (BAT) has been an international leading designer and manufacturer of special purpose vehicles since 1966.

BAT has developed the most advanced and effective **Riot Control Vehicles**. All models employ our “**Jet Pulse Water Cannon System**” which is non-lethal, quick, accurate, effective, cost-beneficial and user friendly. Our **Riot Control Vehicles** are sold internationally and have been proven “in action” in more than 35 countries worldwide.

Our Stationary Water Restraint System (**WRS**) is a non-lethal, high-pressure water stream restraining system designed specifically for control of dangerous inmate situations in correctional facilities (prisons).

The **BAT** systems are flexible, adaptable, modular and “tailor made” to match customer’s precise requirements. The latest technology is employed so that exceptional standards are achieved and maintained.

BAT is ISO 9001 (2008) accredited.
