

Terrogeance Global is a pioneer and global leader in the field of Counterterrorism Web Intelligence Research. We specialize in Home-Grown Terrorism, Terror Funding, Terrorist Capabilities, Improvised Explosive Devices (IEDs), Homemade Explosives (HMEs), relations and connections to criminal groups, strategic research, and more.

Our Products

Among Terrogeance Global's Customers

- ▶ Federal Agencies
- ▶ Military Intelligence Units
- ▶ Police Departments
- ▶ Law Enforcement Agencies
- ▶ Military Academies
- ▶ National Intelligence Agencies

Terrogeance Codex

Amongst the largest and most advanced Terrorist Weapons Technical Intelligence (TWTI) knowledge center, combining 20 years of counterterrorism intelligence.

The Terrogeance Codex™ data repositories contain worldwide details of terrorism-related content, videos, images and tutorials, allowing government agencies and intelligence oriented customers to significantly enrich their databases, for training, forensics and R&D purposes.

IRIS™

Still blind on Instant Messaging Applications (IMA)? Interested in enriching your organization's metadata and attributions? IRIS is the solution for you

Terrogeance's IRIS has aggregated hundreds of thousands of unique identifiers and metadata collected from over 100 countries worldwide radicalized, terror-related and criminal IMA groups. IRIS is constantly updated, providing customers with new discoveries and attributions, and enriching any database, fusion source or intelligence system with a unique set of insights.

Terrogeance Global Experts Reports

All the materials in which these reports are written are collected by Terrogeance's teams using advanced OSINT tools and are analyzed by our experts. These reports are available by subscription to Terrogeance Global Codex platform.

Möbius™

Terrogeance Global Möbius™ reports expose the current operational IED capabilities of terrorists and insurgents worldwide through our monitoring and analysis of open and Deep-web sources, such as password-protected forums, where terrorists and insurgents congregate and plan attacks.

Al-Khemia™

Al-Khemia™ reports deliver in-depth forensic analysis of real-life homemade explosives (HME) recipes extracted by Terrogeance from online terrorist forums, knowledge bases and social networks. Terrogeance not only analyzes the theoretical terrorist recipe, but actually reproduces the stated HME synthesis, according to the recipes, in a controlled laboratory setting.

Hydra™

Terrogeance Global's most wide-ranging Web intelligence report, Hydra™ monitors terrorist trends and developments as they come to light on the web, including where terrorists seek to radicalize, recruit, or plot attacks against various targets. The report evaluates extremist Islamic propaganda, recruitment and radicalization efforts, and deep trends within the evolving world of jihad.

TGAAlerts™

Our TGAAlerts™ identify threats or terror capability developments of imminent interest in near real-time. It covers the Deep-Web by means of Virtual HUMINT™ operations, i.e., we create virtual entities that we then operate as insiders within terrorist and insurgent networks online.
