

PATENTED SECURITY

Unique to every DMI product, BRAIDMARK® stands as a patented security feature, offering unmatched protection for documents and evidence.

The intricately woven patterns through characters on a document, formed by multi-layered elements, render character tampering impossible.

This security feature encompasses both blockchain technology and an exclusive document verification method, empowering courts to swiftly and instantly authenticate officer notes and evidence.

CUSTOMIZABLE & SCALABLE SOLUTIONS

Digital Mobility Inc. (DMI), specializes in eNotes, eTickets, Investigator Notes, eReports, and innovative document security solutions. These offerings are seamlessly integrated with computer-aided dispatch, records management systems, and digital evidence management systems.

As a nimble enterprise, DMI is dedicated to prioritizing its clients and is committed to providing sustainable, scalable, and cost-effective solutions. Our products are meticulously engineered and maintained in Canada, developed in collaboration with active and retired law enforcement personnel, as well as other public safety professionals. This collaborative effort aims to achieve time-saving efficiencies by enhancing workflow, integrating services, ensuring quick access to data, and reducing overall workload. The benefits extend not only to front-line staff members but also to internal and external stakeholders.

CUSTOMIZABLE TO EACH AGENCY'S REQUIREMENTS

AVAILABLE IN ALL LANGUAGES

SCALABLE TO SUPPORT GROWING AGENCIES

INTEGRATION WITH:

- Computer Aided Dispatch (CAD)
- Records Management Systems (RMS)
- Digital Evidence Management Systems (DEMS)
- Major Crime Management Systems (MCM)
- Automatic License Plate Readers (ALPR)
- Criminal Background Check Databases
- Scheduling Systems
- Inventory Systems
- Future NG911
- Court Disclosure Systems
- Body-worn Camera Systems

IMP serves as a comprehensive solution meticulously crafted to aid police officers and investigators in fulfilling their responsibilities. The idea and development of this application originated from a collaborative effort involving both active and retired Canadian and American law enforcement personnel.

Utilizing IMP has the potential to revolutionize the arduous tasks of note-taking and evidence collection, turning them from error-prone and cumbersome processes into a streamlined and secure workflow.

Moreover, the incorporation of cutting-edge patented technology ensures the integrity of evidence is preserved seamlessly, starting from the moment of a violation through to the presentation of evidence during trial.

CUSTOMIZATION

Tailoring our solutions to individual needs is entirely achievable, recognizing that each organization possesses unique forms and procedures. This adaptability is facilitated by DMI's utilization of distinctive technology.

INTEGRATION

Achieving integration with any system is feasible to reduce duplications for officers. CAD details can be effortlessly imported, while field reports and eNotes can be seamlessly transmitted from any RMS. Additionally, digital evidence can be securely gathered and directly sent to DEMS from an officer's mobile device.

HOSTING

Our solutions are designed to support both on-premises and cloud hosting. Allowing agencies flexibility, scalability, and added security.

EFFICIENCIES

Efficiencies such as drivers license scanning, speech to text, witness audio statements, biometrics capabilities and integration with body worn cameras, dashboard cameras and license plate readers are only some of the possibilities that can speed up an officer's work.

INTELLIGENT ECO SYSTEM

Through quick access to intelligence, artificial intelligence investigative support, and business intelligence reporting, the Intelligent Mobile Patrol ecosystem enables cross-agency collaboration to hasten investigations.

To give officers the flexibility of cross-platform use, all applications have been developed natively for Android, iOS, and Windows.
