## Surface Hidden Storylines

Successful investigations turn on an investigator's ability to quickly extract actionable intelligence, uncover the story behind the facts and decide where to go next.

**VoyagerInsights** is an advanced AI central investigative platform designed to solve cases by automatically uncovering relevant leads as well as leads investigators were not aware of.

By analyzing and understanding the case's unstructured and structured data, the platform discovers and highlights the story behind extracted facts and inferred facts.

By using cutting-edge sophisticated AI technology, organizations save time and money by automating and optimizing routine processes and tasks, increase productivity, improve operational efficiencies, and make faster decisions. All at the same time of extremely user-friendly and easy-to-use platform.

**VoyagerInsights** is an easy-to-deploy platform that offers users a visual presentation of the results in a multi-layer map of all case-elements, so intuitive it can be used by investigators, analysts and business users alike.
