PORTABLE & RECOVERABLE TARGET FOR ASW TRAINING

May 24 - 2023

How to allow easy and high ends ASW training without mobilizing some of Navy's most valuable assets ?

Need for
ASW training solution
to replace the Submarine
during **ASW Training**

Navies requirements to replace old technologies:

- 1 – Easy To Use
- 2 – Easy to Recover
- 3 – Train Realistically
- 4 – Intrinsically Safe
- 5 – Easy to Maintain

“The target must be affordable, portable, reusable and shall give a realistic acoustic response within their peripheral frameworks”

ASW UNITS NEEDS TO MAINTAIN

Basic Training

A single unit for operator training in elementary anti submarine tasks for :

- Surface Unit, MPA,HELO or SUB :
 - Active mode: detection, tracking, classification, internal procedures
 - Passive mode: detection, tracking, classification, TMA (Target Motion Analysis)
 - Use of weapons: Torpedo firing exercise

ASW UNITS NEEDS TO MAINTAIN

Advanced Training

- Training in cooperation with several ASW assets
 - Application of procedures
 - Naval force management / Coordination of assets
 - WSM (Water Space Management) / PMI (Prevention of Mutual Interference)
 - Safety rules in exercise
 - Anti torpedo reaction

SEMA

PORTABLE & RECOVERABLE TARGET FOR ASW TRAINING

RTSYS

CHARACTERISTICS

- Length: L 213 cm
- Weight: 33 kg
- Operating depth: 300 m
- Speed: 15 knots
- Autonomy: 20 hours at 4 knots
(1.5 hour at 15 knots)

ACOUSTIC FEATURES

- Echo-repeater (1 to 33 kHz)
- Noise maker: 200 Hz to 38 kHz
- 2 broadband: 450 Hz to 8 kHz
and 10 to 23 kHz
- 6 narrowband: 200 Hz to 38 kHz

SEMA

PORTABLE & RECOVERABLE TARGET FOR ASW TRAINING

RTSYS

SEMA target aims at:

- **Passive Sonar** implementation training
- **Active Sonar** implementation training
- **Torpedo** implementation training

Operational functionalities implemented:

- Noisemakers simulation (6NBN, 2BBN)
- **Active Sonar** or **Torpedo** repeater
- Distant **STOP**
- Signals and **remote** actions

SEMA target aims at:

During a mission

- A different acoustic payload can be assigned to each mission tracks (**segment** or **waypoint**)
- Easy to **launch and recover**
- **Easy to program**

General Overview

- **Controlled cost**
- Unique **NSN: NATO Stock Number**

SEMA

PORTABLE & RECOVERABLE TARGET FOR ASW TRAINING

RTSYS

SEMA CAPABILITIES TO REPLACE THE SUBMARINE FOR THE TRAINING OF:

FRIGATES / CORVETTES

- Variable Depth Low Frequency active sonar
- Hull mounted Sonar / Bow mounted sonar

ASW HELICOPTERS

- Low frequency active dipping sonar
- Active/passive Sonobuoys

MARITIME PATROL AIRCRAFTS

- Active/passive Sonobuoys

TORPEDOES

- Latest generation light & heavy weight torpedo (**MU-90, A244-S, Mark54, F21,...**)

Accessories Case

Laptop Case

Launching ramp

Spare Battery Case

SEMA

PORTABLE & RECOVERABLE TARGET FOR ASW TRAINING

RTSYS

Advantages

- Modern sonar & torpedo compatibility (LFAS, VDS, HMS, ADS)
- Real fight training scenario
- Easy to deploy, recover and maintain
- Reconfigurable in 1 h

SEMA COMPARED TO OTHER TARGETS

Kinematic capabilities

Maximum speed of 15 kt – Allow a realistic behaviour of SSK.
Autonomy 20 hours

Acoustic capabilities

Responds to new generation sonar (low frequency – long pulse up to 16s)
Audio files player (UWT codes or signature)
Relevant homing sonar torpedo response

Recoverable target

Mission report: debriefing enabling full analysis of every exercise
Acoustic record: audio analysis – Intelligence – Sonar performance checks

Acoustic Comms / Remote control

Acoustic and Kinematic changes even during mission
Stop or scuttling orders capabilities

Permanent evolution

Current upgrades: MAD, Radar reflector, Heli-winch
