AUTOMATIC GUITAR CUTTER - AUTOMATISCH SNIJAPPARAAT - TRANCHEUSE AUTOMATIQUE

The automatic guitar cutter can be used for cutting a large range of products which can't be cut manually or with the manual guitar cutter. It's compatible for cutting soft nougat, almond paste (marzipan), jelly products, short crust pastry, wafers, giandua, ganaches, mignon pastry products and especially any kind of chocolate containing dried fruits or any other hard pastry dough.

This automatic guitar cutter contributes to an easy, fast and hygienic production. This machine is also easy and safe in use.

All components that come in contact with food are manufactured out of stainless steel. The parts can be removed and washed in a dish washer.

There is a large assortment of frames available. Personalised frames available on request. The cutting wire and frames are easy to replace.

If you would like to order this machine you need to make a choice between a 5 mm or 7.5 mm base.

Every cutter is provided with 1 cutting head (5 or 7,50 mm), 1 extra roll of wire.

FOOD JELLY FOR MOULDS - GEL VOOR VORMENCREATIE - GEL ALIMENTAIRE POUR LE MOULAGE

COL4005

Re-usable jelly for mould making. The food jelly allows you to create your own mould for chocolate.

How to use:

1. Melt the jelly in the microwave until the product is completely liquid.
2. Grease your model with vegetable oil.
3. Put the model into a container.
4. Fill container until model is coated.
5. Remove the model from the hardened jelly. You can use a cutter if necessary.
6. Close the obtained mould with an elastic (rubber band), then pour the chocolate and wait until it is hardened.
7. Carefully remove the chocolate model and proceed with final decoration.

If you want to re-use the jelly to make a new mould, melt again in the micro-wave. If you prefer to preserve your mould, wrap it with plastic film without air and far away from humidity and warm/heating sources.

Use: Loose gold leaf inserted between bound pages of tissue.
Apply with brush, point of a knife or tweezer on flat or non-planar surfaces.

Use: Gold leaf mounted by pressure to individual tissue pages, recommended for use on flat surfaces. Each page can be lifted by hand from the book. You can also easily cut the mounted leaf with scissors. The leaf will stay on the tissue until it is pressed onto the prepared surface and the tissue backing is removed.

"CHOCOLATE ARTIST" FOR MAGNETIC MOULDS - VOOR MAGNEETVORMEN - POUR MOULES AIMANTÉS

"THE KEY TO PRINT YOUR CHOCOLATE" AN IDEA OF CHOCOLATE WORLD

Chocolate Artist is a system that allows you to print your own custom transfer sheets yourself using a domestic printer compatible with edible ink, neutral transfer sheets and our software Chocolate Artist.

The software contains almost all lay-outs of our available magnetic moulds and automatically centralises your image on the cavities of the selected magnetic mould. The system features adding text, changing colours and adding backgrounds.

This solution is recommended for small production batches working with white chocolate only.

Remark: best results are always achieved with white chocolate

Software Features

- Supports all TWAIN compliant scanners.
- Import all major image formats such as jpeg, gif, tiff, and png.
- Automatically position designs for correct printing onto transfer sheets.
- Create text and messages with ease, even add circular text to round chocolate.
- Easily fill entire transfer sheets.
- Includes the ability to apply special effects and crop pictures.
- Remark: 1000L06, 1000L08, 1000L11, 1000L18, 1000L23, 1000L26, 1000L34, 1000L37 and 1000L38 are not possible to design in the software (*)

ART1001

USB security stick

The USB security stick is the key which will allow you to print your own design on the neutral transfer sheet. You need a personal computer and printer compatible with edible ink.

The USB security stick does not contain any software or data, you can download the software free of charge.

AZO FREE COLOURS - AZO FREE KLEURSTOFFEN - AZO FREE COLORANTS

Chocolate World proudly presents its collection of AZO free colours, meaning the entire range of our food colourants is 100% AZO-dye free. To explain why we took the decision to ban all AZO-dye containing colourants, it's important to know what AZO dyes are.

AZO dyes are colourless particles, which have been coloured using an AZO compound. Many AZO dyes are non-toxic, although some have been found to be harmful for health. Some of these AZO dyes are used for the production of food colourants, the so-called 'E-numbers'.

Following E-numbers are known to contain harmful synthetic colourants: E102, E104, E110, E122, E124 and E129.

To preserve the safety of our customers & the final consumer, Chocolate World decided to suspend the sale of any colourant with AZO dye.

The regulation (EC) No. 1333/2008 of the European Parliament and the Council of December 2008 on food additives lays down rules on food additives used in foods, ensuring a high level human health and consumer protection, and provides for rules on the labelling of food additives.

e.g. Starting January 2009 all the food products containing above mentioned 'E-numbers', must report on their label the following text: "may have an adverse effect on activity and attention in children".
