

Quality means BOMBAY SWEETS

Bombay Sweets & Co. Ltd. (BSCL) is a name associated with consumers of snack food for more than decades in Bangladesh and abroad. It made its modest start way back in 1948. Gradually it increased its popularity amongst the consumers in meeting their demands. Initially the company served its customers from their own outlets. At present, the company has a strong distribution network throughout the country and

In the new millennium, Bombay Sweets is a leader in the snack food industry in Bangladesh. The company continually introduces innovative products and packaging needed to satisfy ever-changing appetites and tastes of its consumers.

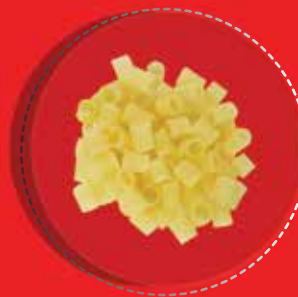

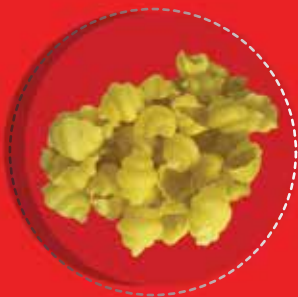

Wide range of quality snacks and frozen food products currently consists of more than 25 items including potato, corn and cereal based products. All are available in a variety of shapes, sizes and flavors.

BSCL's core competitive advantage lies in consistency of quality which comes from fully automated production lines and cost advantage which comes from producing more than 100 tonnes of snacks per day and through backward vertical integration by contract farming.

associated companies

TRICEPACK LIMITED

Tricepack Ltd. (TPL) was established in 1998. The company manufactures various types of flexible packaging materials for local and foreign markets. The facility is equipped with state of the art Vacuum Metalizer, 8 color rotogravure printing machine, solvent & solvent less dry laminators, 3 layer co-extrusion film production line, holographic embossing line, slitter rewinder and pouch making machines. We also have a full fledged R&D facility and well equipped lab to cater to various demands of diverse customers in confectionery, snack food, detergents and frozen food to name a few.

Our one stop packaging facility includes:

Metalizing : We are equipped to metalize upto 1250 mm wide substrates. Our range includes BOPP, PET, CPP, PVC, etc. high barrier films with uniform metal coating are produced on state of the art metalizer from General Vacuum, U.K.

Printing : Upto 7 color rotogravure printing jobs can be under taken with precision registration control on fully automatic machines from Japan. We are also capable of printing 1250mm wide substrates like PET, BOPP, CPP, Nylon, paper etc.

Dry Lamination : Our facility is equipped with solvent and solventless dry Laminators to give odorless substrates and it is the only facility in Bangladesh to offer solventless laminates.

Three layer Extruding : The extruder is capable of producing upto 1300mm wide plastic films with blown process (3 layer construction) to cater the packaging needs of milk, oil, snacks and detergents to name a few.

Holography : This gives a distinct look along with the security of non duplication of your product range. This is the only company in Bangladesh to offer holography and security to your product and to protect your company from unethical competition. We shall offer holographic products to only one company from every industry segment based on our assessment.

Slitting : Our company uses state of the art machines from Titan, U.K., to give quality winding to finished products at high speeds. We are capable of producing high volumes for timely delivery of goods to the customers.

Pouch making : Our machines are capable of making three side seal pouches, gusset pouches, centre seal pouches, lap seal pouches of different sizes and from various substrates.

Product range that may be covered from our facilities include:

Processed Food / Snack Food, Pharmaceuticals, Chocolate/ Confectionery, Frozen Foods, Dairy Products, Fruit Juice/ Concentrates, Detergents/ Soaps, Cosmetics, etc.

INK Production : TPL also has blending facility for surface and reverse printing inks. Our range includes Briteflex / Multigloss inks used in surface printing of polyethylene, Al-Foil and Polypropylene films. These inks have been carefully formulated for Flexo and Gravure Printing. Our range includes all popular color shades. We also supply medium and solvent and shortly we shall be introducing mono and bi-component adhesives.

Another type of ink called Unilam inks are used for reverse printing of BOPP and Polyester Films. Unilam inks are unique in view of their excellent half tone printability and common application on both BOPP and PET films.

BOMBAY AGRO LIMITED

Bombay Agro Limited (BAGL) located in the north of Bangladesh, BAGL mainly cultivates and stores agricultural products to fulfill the raw material requirements of its parent company - Bombay Sweets. It also provides seed support to the farmers to ensure quality seeds. Bombay Agro also undertakes training programs by local and foreign experts to ensure quality produce and to enhance productivity of the farmers.

KULIARCHAR DAIRY COMPLEX

Kuliarchar Dairy Complex (KDC) is situated at Kuliarchar P.S., in Kishoreganj district. This area is considered as one of the milk pockets in the locality.

In 1969, a pilot dairy plant was setup by the government for the purpose of training the youth about dairy products and also to utilize the amount of fresh milk produced in the locality, as communication was very poor at that time.

In 1976, the government decided to divest the project. Although the project was sold, due to some reasons the entrepreneur could not run the unit successfully.

In 1983, the present management purchased the unit and successfully started production.

KDC, under the brand name of 'Kisan', produces a wide variety of cheese products such as processed cheese, natural cheddar cheese, mozzarella cheese, etc. and Butter.

KDC boasts of producing high quality and best-tasting products.

The secret
behind our decades
of success is
Quality

Bombay Sweets' products are prepared with fully automatic machines without any human touch from fryer to the packing machines. Products are prepared with selected raw materials maintaining the highest level of purity and manufactured under hygienic conditions. When packed for export, nitrogen is flushed for extra freshness and longer shelf life.

To ensure high quality standards, all raw materials and finished products are tested in our fully equipped laboratory through qualified personnel.
