

CANDELA

*Doing good, doing it right*

[www.candelaperu.net](http://www.candelaperu.net)

We are a fair trade organization committed since its inception to the responsible management of biodiversity and the conservation of ecosystems. We work mainly with products and producers from the Peruvian Amazon forest, giving value to traditions and knowledge for the welfare of our customers. We are founder members of the Union of Ethical Bioproducts (UEBT) and members of the World Fair Trade Organization since 1993.

We have a busy factory in Lima with a total production capacity of 300 tonnes per year of cold pressed oils. The factory in Madre de Dios has been upgraded and it is in the final stages of receiving BRC certification.

## *Doing good, doing it right*

We have more than 25 years experience of working with communities, organising the supply chains and extracting oils from a wide range of nuts and seeds.

We are convinced that working in harmony with nature, making sustainable use of ecosystems; hand in hand with the producers, we strengthen and empower value chains, creating products for ethical and responsible consumers.

*Discover our way to preserve biodiversity, discover Candela's products.*

## Where do our products come from?

Peru is recognized worldwide for being one of the ten megadiverse countries, thanks to the biological diversity in ecosystems, landscapes, species, genetic resources and cultural diversity.

Candela is committed to Peruvian biodiversity, promoting value chains and responsible consumption in Peru and the world.

We have an especial interest on Madre de Dios because of its diversity, that allow us to give value to native plants and seeds and to make stronger relationships with our suppliers.

### The Peruvian Amazon

The Amazon River, which runs through the territories of Peru, Colombia and Brazil, is the longest river in the world and hosts a huge diversity of native species of flora and fauna that coexist in harmony with native cultures.

The Amazon is the lung of the world and a large reserve of fresh water, so we have the responsibility to conserve this pristine forest and thus preserve life.

CANDELA
