ABOUT US

Piranha is proudly a 100% Australian owned manufacturer and distributor of highly specialised products for the off road 4WD industry.

Piranha began as a family owned business. Traditional business values of excellent service and client satisfaction are essential to Piranha's business philosophy today. All staff take time to talk with you and advise on the best solution for your vehicle.

With over 30 years in the 4WD market, you are dealing with experts and leaders in the industry.

Today, Piranha has stores and distributors located throughout Australia with their main aim: to provide you with the best and most reliable products for your 4WD needs.

Piranha Off Road is a manufacturer and distributor of after-market off road accessories and other products. Piranha Off Road makes no representation that it has an affiliation with, or sponsorship or approval from, any car manufacturer. Any use of the names of car manufacturers or models are used only to describe the suitability of Piranha Off Road's products with the relevant manufacturer.

OPTIONAL EXTRAS

- ✓ LED tail light upgrade pack
- ✓ Under tray toolbox
- ✓ Under tray Water Tank (10L, 23L & 30L)
- ✓ Rear Ladder Rack
- ✓ Trundle Drawer
- ✓ A wide range of lockable tool boxes and Alloy canopies

Available in the following sizes:

- ✓ Dual Cab Ute (Shorter Tray) 1500Lx1825Wx260H
- ✓ Dual Cab Ute 1800L x 1825W x 260H
- ✓ Space Cab Ute 2100L x 1825W x 260H
- ✓ Single Cab Ute 2400L x 1825W x 260H

FEATURES

- ✓ Integrated Cargo Tracks
- ✓ Built-in steel runners for trundle drawer mounting
- ✓ Heavy duty 3mm one-piece checker plate floor
- ✓ 260mm high sides, with TIG welded end caps
- ✓ 4 integrated lashing rings
- ✓ Laser cut safety mesh
- ✓ 76mm diameter headboard tube with ladder pins
- ✓ Mudguards with mudflaps
- ✓ Tail light protectors
- ✓ Heavy duty hinges
- ✓ Heavy duty mounting system
- ✓ Quick release over centre latches
- ✓ Continuous 32mm tie down rope rails

LED INTERIOR CABIN LIGHT (BATTERY OPERATED)

SECURITY

- ✓ PIRANHA CANOPIES are designed to be safe, reliable and secure.
- ✓ Comes standard with a high-quality 2-sided handle and key set, allowing you to lock the canopy with reassurance.
- ✓ Made and assembled with high-quality parts and raw materials which are controlled under ISO9000 and ISO14001, the canopies are durable, long lasting and protected.

- ✓ The PIRANHA canopy protects and shelters everything in the back.
- ✓ Strong & Lightweight
Made with high quality 3-Layer fibreglass and reinforced composite.
- ✓ Non-corrosive
Able to resist temperatures up to 80C and below -20C.
- ✓ 4x lighter
Easier to install and with its aerodynamic properties, much better on fuel.
- ✓ Smooth Surface
Ensures the highest quality paint job to fit on your ute seamlessly.

PIRANHA CANOPIES are custom painted to match the colour code of your car.

Please note: the process of matching the colour code is not the same as colour matching. Due to environmental factors such as fading, we cannot guarantee the paint job will be the exact same paint colour as on your car. To get the closest match, we recommend leaving your fuel cap with us so we can get the closest match to your car. Call us on (03) 9762 1200 for more information.

FEATURES

- ✓ Integrated central locking system to rear window
- ✓ Integrated Spoiler with LED rear brake light
- ✓ Dark tinted side windows with a choice of lift up, sliding or a combination included in the price
- ✓ Front sliding window
- ✓ Key locking side windows as standard
- ✓ Carpet lined interior for a clean modern look that prevents moisture build up
- ✓ Painted in australia to match the vehicles colour code.

AUXILIARY BATTERY SUPPORT TRAYS

Piranha have over 150 different battery trays

Piranha manufacture, right here in Australia, the most extensive range of electroplated steel (not plastic) auxiliary trays of any company today and our products are engineered to high standards to ensure reliable operation in tough Australian conditions. Not only do we make auxiliary trays, but some replacement trays for original equipment units.

Piranha Battery Trays

Piranha battery trays are made of 2mm thick mild steel with a thick 8 to 12 micron zinc electroplate plus a Chromate Conversion (gold) electroplated top coat. Accessories for the tray (body washers and top mounts etc.) are also electroplated to the same standards.

This produces a remarkably strong and reliable tray made to the highest quality and standards.

Piranha have invested a large amount of time and money to produce the best battery trays at the cheapest possible prices. We manufacture over 150 trays for all major 4WD models, with detailed fitting instructions and support available. All trays come with a 2 year or 5 year, unlimited kilometre warranty (see warranty statement).

Why buy a Piranha Battery Tray?

1. The Largest Range

The largest range of auxiliary battery trays in the southern hemisphere

2. Purpose Built

Over 150 purpose built trays specifically designed to fit your vehicle.

3. Plated Not Painted

Electroplated not painted or powder coated. Plating gives the best protection bar none.

4. Fit Largest Capacity Auxiliary

Engineered to hold the largest Auxiliary battery that's safe to fit without compromising the structural integrity of your vehicle

5. High Quality Nuts & Bolts

High quality hardware, high tensile grade 8 nuts & bolts, quality J bolts & custom built top mounts to suit most trays.

6. Full Instructions / Tech. Support

Full installation instruction sheets supplied and technical support available.

7. Made in Australia with Australia Wide Distribution

8. 2 Year Unlimited Km Warranty

2 year unlimited kilometre warranty (TRADE ONLY) - conditions apply.

9. 30 Years Manufacturing Experience

Over 30 years manufacturing experience by a 100% Australian company.

10. Great value for money!

Leaf Springs

A leaf spring is a rather agricultural design that dates back many, many years. It actually suits a purpose very well and is still used in many suspension designs these days.

When developing a leaf spring design at Suspension Supplies Australia, the latest design techniques are applied to this original concept and provide an un-compromised ride that is designed to suit the loads the vehicle will be carrying. These are available in 2 different types to suit different applications.

Single Stage – Generally used for the front of the vehicle where the load will never vary greatly.

Dual Stage – More commonly used and is what is found in the rear suspension designs of many late model pickups where the vehicle's weight may vary. Essentially, the first stage provides a comfortable ride for the day to day use and second stage steps in when additional loads are added to the vehicle. The spring is compressed onto the second stage and this supports the load from the 1st stage.

1. **Thinned Diamond Cut Leaf Ends** for optimal ride performance and less friction
2. **Military Wraps** for additional strength (where applicable)
3. **Bolt Clips** to prevent separation of leaves in articulated situations

4. **Anti-friction liners** are installed between leaves to provide a consistent, quiet and smooth ride

5. **Anti-friction liners** installed to clip liners to reduce noise and vibrations caused from the use of the spring

All Leaf Springs are available in a number of different load carrying options as well as our comfort range for those vehicles not used for carrying loads. Most leaf springs are designed to provide up to a 50mm lift over the factory ride height.

| 4. Sintered Piston | |

Coil Springs

A coil spring is basically a more modern version of the leaf spring. It still supports the weight of the vehicle and is available in both a single and progressive stage in some applications. It will provide a smoother ride than a leaf spring, generally found in 4wd wagons, both front and rear.

We are also starting to see pickups coming with this style of factory suspension fitted. Our well designed coil springs are made in Australia and offered in a number of different load carrying options to suit the requirement for each vehicle.

- Made in Australia of high-stress X5K spring steel
- Finished in high-quality epoxy powder coat
- Shotpeened, scragged and load tested to prevent spring sag
- Heat treated and rolled at heat
- Available in a number of different load carrying and height options

Upper Control Arms

- Built in caster & camber correction for raised vehicles
- Fixed position heavy duty greaseable ball joint
- Powdercoated steel construction
- Built in provisions for relocating OEM ABS lines (where required)
- Available for Ranger, Dmax, Colorado, Triton, Pajero, Navara, Hilux, Revo, Fortuner and Cruiser

STEERING DAMPERS

The steering damper is the shock absorber of your steering. It is designed to dampen the shock load caused when your vehicle hits a hole or bump in the road, reducing the shimmy and vibration. Suspension Supplies Australia offers high-quality foam cell steering dampers for a wide range of vehicles.

TORSION BARS

BlueMax Torsion bars offer an increased rate over factory torsion bars, which will also deal with the additional accessories fitted to your vehicle.

STRUT MOUNTS

Suspension Supplies Australia offers replacement strut mounts for a wide range of replacement strut mounts for a wide range of vehicles, manufactured as a direct replacement to the original.

POLYURETHANE LEAF SPRING BUSHES

Suspension Supplies Australia recommends Polyurethane bushes for use with BlueMax range of greaseable swing shackles and fixed pins. Designed and manufactured in Australia, these bushes feature grooves for grease distribution and retention providing an extended life for all of the moving components.

U-BOLTS

A very important part of the suspension on the leaf spring vehicles is the u-bolts. These u-bolts effectively hold your leaf springs onto the differential housing, keeping everything together. It is important to replace the u-bolts when the springs are removed or replaced. U-bolts are made specific to your vehicle and spring combination, and are finished with a zinc coating for superior corrosion resistance.

GREASEABLE SHACKLES

Greaseable swing shackles are an important part of the leaf spring suspension system. They attach to one end of the spring allowing for the leaf spring to work through length changes during suspension articulation. Shackles are made of high-quality steel and are zinc coated for superior corrosion resistance. By being greaseable, they offer extended life. These are always best used with BlueMax Polyurethane bushes.

GREASEABLE FIXED PIN

The greaseable fixed pin is used to attach the leaf spring to the vehicle at the opposite end to the swing shackle. Suspension Supplies Australia's greaseable fixed pins are made of high-quality steel then zinc coated for superior corrosion resistance and greaseable for extended life. These are always best used with BlueMax Polyurethane bushes.

LIGHT BARS

Lightbars are a very popular alternative choice these days and not only for 4WD drivers – road cars, boats, ATV's, agricultural equipment – wherever powerful light in a compact format is required. Many people are opting for one light bar being fitted on a nudge bar or bumper on street driven vehicles for safer vision at night. Light bars provide outstanding light, whilst being small enough to fit on most vehicles.

It's not just how good these light bars look; it's what goes in them that makes them special. These lights are good for the usual 12 volts, or trucks running 24 volt electricals. The thermal management system provides maximum light whilst protecting the light from overheating. EMC/EMI suppression means no radio or other electrical interference will impact the driving experience.

Piranha's ethos of 'rugged and reliable' holds true with these light bars. They are built tough with die-cast aluminium housings, OSRAM chips, excellent curved reflector design, high impact sleek rimless design polycarbonate lenses and black powder coated stainless steel mounting brackets and stainless steel bolts included.

There are two light bar lengths available – 22-inch and 30-inch, both in 'combo' beam patterns. This combined pattern gives best of both worlds – serious light down the road and more than decent spread out to the sides.

In fact, the bigger 30-inch unit pushes 1 Lux of light over 925 metres, whilst the smaller 22-inch light has a still impressive range of just over 800 metres @ 1 Lux. That's comparable to or better than some dedicated driving lights!

FAST LOCK

What is Fast Lock?

Fast Lock is a recessed drop T lock with an integrated electrically controlled lock/unlock system that can be made to function with the existing vehicle remote central locking system or with an independent central locking module.

Fast Lock Locking System is unique and Internationally Patented. The technology has been tried, tested, and proven as a device that will give peace of mind.

- IP65 Certified – Rain, Dust and Dirt-Proof.
- Integrated Design – internationally patented.
- Electric motor actuator multi-volt 12-24V to locking mechanism on key barrel.
- Plug and play harness to electric motor to attach to central locking.
- Plugs are compatible with most aftermarket central locking systems.
- Compact and durable.
- Quick installation without dismantling the lock.
- 3 Point locking available, if required.
- Can use key to over-ride manually, if required.
- Concealed stud fix security.
- Assembled and tested in Australia.
- Warranty – 24 Months.
