

# RENEGADE-X

## EXTREME OFF-ROAD TRACTION

High void-to-lug ratio combined with deep side blocks and a specially formulated Rock-Crawl tread compound provides exceptional traction and grip on rocks, gravel, mud and soft soil. Mud-rescue shoulder provides additional traction that helps pull your vehicle out of mud.

## ENHANCED DURABILITY

A unique combination of stone ejectors and serrations adds an additional layer of reinforcement to increase puncture resistance.

## TOUGHER SIDEWALLS

High turn-up 3-ply sidewall construction combined with aggressive "stealth" shaped sidewall lugs provide biting edges for additional grip and traction, and provide protection from external sidewall damage.

## ON-ROAD COMFORT

Optimised tread pattern design reduces noise for a quieter and more comfortable on-road ride.

## EXTREME TERRAIN

The Renegade-X is the all new and top-of-the-line extreme terrain tyre range from Radar Tyres. Its revolutionary "Stealth" inspired design provides the fine balance between form and function. This feature-packed range is designed and engineered for drivers that need extreme off-road performance on mud, rocks, gravel and sand while offering durability and an aggressive aesthetic that enthusiasts crave.
