

TRANSMISSION OIL COOLER KITS

Direction Plus Transchill Arctic Black Transmission Cooler Kits are the ultimate solution for off-road enthusiasts and 4WD adventurers. Designed to withstand the toughest conditions, these kits offer **superior cooling performance to keep your automatic transmission running at optimal temperatures**, even in the most extreme environments.

Featuring a high-efficiency heat exchanger with increased surface area, the Arctic Black coolers provide maximum heat dissipation, ensuring your automatic transmission stays cool and reliable. The durable black powder-coated aluminium ensures long-lasting durability and corrosion resistance, making these coolers perfect for off-road use.

Whether you're tackling rugged terrain, towing heavy loads, or navigating through harsh climates, the Arctic Black transmission cooler kits from Direction Plus have got you covered. With **easy installation and all necessary mounting hardware included, you can hit the trails with confidence, knowing your transmission is protected from overheating and costly repairs.**

Upgrade your 4WD with a Direction Plus Transchill Kit and experience unparalleled cooling performance, even in the most demanding off-road conditions.

PRE-FILTER KITS

Direction Plus Pre-Filter kits are the ultimate solution for diesel fuel vehicles operating in extreme weather conditions and areas with poor fuel quality. Whether you're an avid off-roader or frequently encounter water crossings, **our pre-filters ensure that the diesel fuel you use is clean and contaminant-free.**

We offer a range of pre-filter kits to cater to your specific needs, including **Fuel Manager, Ryco, and PreLine-Plus**. The **Fuel Manager** offers high protection against water contamination with its 30-micron media, **removing 95% of contaminants** before they reach the main fuel filter, maximizing its service life.

For high-pressure modern engines, the **Ryco Pre-Filter** kits provide 10-micron filtration, **effectively removing 99% of water and 98% of particles from diesel fuel.**

The **PreLine-Plus** offers superior protection against water and particle contamination with its 30-micron dual-layer media, **removing 99% of water and 98% of particles**. Additionally, it features a water sensor that alerts you when servicing is needed, ensuring optimal performance and safeguarding your 4WD vehicle.

POST-FILTER KITS

In the world of diesel fuel vehicles, poor fuel quality can be a significant concern, leading to potential engine damage and costly repairs. Fortunately, the **Direction Plus Fuel Manager Post-Filters Kits** offer a reliable solution to combat this issue. Designed to cope with contaminated diesel fuel, **these post-filter kits remove smaller particles and impurities that may have slipped through the factory fuel filter.**

Whether you store your fuel in jerry cans or venture off-road in dusty environments, the Direction Plus Post-Filter Kits ensure that your diesel fuel remains clean and free from harmful contaminants. With 2-micron and 5-micron filtration capabilities, these post-filters provide maximum protection for your diesel fuel system, safeguarding it against particle contamination and preventing injector failure.

By incorporating these post-filters into your diesel fuel system, you can enjoy peace of mind knowing that your engine is receiving the cleanest possible fuel, minimizing the risk of costly breakdowns and maximizing its performance and longevity. Invest in the Direction Plus Post-Filters by Fuel Manager and experience the ultimate diesel fuel protection.

CATCH CAN KITS

Provent Ultimate Catch Can Kits are designed to protect modern diesel engines from the harmful effects of blow-by gases. These gases, containing unburned fuel, oil mist, and soot particles, can accumulate in the intake system, leading to reduced performance, increased emissions, and potential engine damage. **The Provent Catch Can system effectively separates and captures 98% of these contaminants.**

Direction Plus offers a wide range of ProVent Catch Can vehicle-specific kits, seamlessly integrating with popular diesel trucks and SUVs. By **preventing soot and oil buildup in the intake system**, the Provent catch can kit extends the lifespan of critical components like turbochargers, intercoolers, and EGR valves, reducing costly repairs.

Our kits come with a drain kit for convenient maintenance, allowing easy removal of collected contaminants. With advanced filtration technology, vehicle compatibility, and easy maintenance, Provent Ultimate catch can kits provide comprehensive protection for modern diesel engines, extending their lifespan and ensuring reliable performance.
