# RAID APPLICATION

## 2021+ Toyota LC300

KONI's legendary RAID shock absorbers are now available with an external rebound adjustment for the Toyota LC300. Both front and rear shocks can be adjusted while still on the vehicle.

This adjustability allows the operator the flexibility to change the rebound dampening effect to suit the surface conditions and load being carried by the vehicle.

Improved handling both on and off-road. KONI's new RAID externally adjustable shock absorbers suit vehicle heights from standard up to a 2" / 50mm lift.

KONI RAID is the perfect upgrade for your LC300.

### Toyota

Model	Year	Product	P/N	Vehicle Position
LC300	2021+	RAID	9010 - 1002	Front
			9010 - 1003	Rear

VEHICLE SPECIFIC PRODUCT MAY LOOK DIFFERENT.

### RAID

The KONI RAID shocks are the damper of choice when adventuring off road. From the deserts of Africa, to the South American jungle; the Australian outback or the icy North Pole, the KONI RAID is proven in all environments. Oversized, over-engineered and made to ensure performance, strength and safety are paramount, it is easy to choose the KONI RAID.

### Features and Benefits
