Service Intervals	12 months/12,000 km (whichever occurs first)^					

†19 Speakers including subwoofer and six coaxial two-way speakers strategically mounted in 12 locations throughout the vehicle

†Maximum braked towing capacity is subject to regulatory requirements and vehicle weight restrictions (which may require occupants and/or luggage to be restricted)

*Payload and kerb weight figures are based on vehicle certification. It is the driver's responsibility to ensure: weight of fully loaded vehicles do not exceed GVM; front and rear axle load limits are not individually exceeded; the combined weight of the fully loaded vehicle (including tow ball download when towing) and trailer does not exceed the GCM; compliance to State and Territory towing regulations. Payload is the combined value of occupants, luggage, cargo, added options, accessories and tow ball download (when towing). Kerb weight includes the vehicle with a full tank of fuel and all standard equipment, excluding occupants. Additional weights of optional features, occupants, luggage, cargo, accessories and tow ball download (when towing) must be taken into account when calculating payload.

^Figures according to ADR 81/02 derived from laboratory testing. Factors including but not limited to driving style, road and traffic conditions, environmental influences, vehicle condition and accessories fitted, will in practice in the real world lead to figures which generally differ from those advertised. Advertised figures are meant for comparison amongst vehicles only.

^Warranty terms, conditions, and exclusions apply.

†eTorque incorporates an onboard electric motor to create a mild-hybrid system. Benefits are numerous, including longer 4-cylinder operation while in the MDS (cylinder deactivation) mode and more refined Stop/Start capability. The onboard motor interacts with the regenerative braking, creating a generator which converts kinetic energy to recharge the battery system.
