

**HEAT PROTECTION
PRODUCTS**

TURBO COVER (BEANIE)

Turbochargers create a massive amount of heat, this heat can lead to damage being caused to electrical wiring, fuel/oil lines etc and even melting and blistering paintwork, a Turbo cover is designed to insulate the turbochargers exhaust housing keeping the heat inside the turbocharger itself, not only does this protect vital components in the engine bay but it also helps improve turbo response and retains boost pressure.

Rated to 550°C

Silicone Construction

Rated to 700°C

Made from crushed basalt

Sizes available:

753001 T2
753002 T3
753003 T4
753006 T6

- Protects vital engine components
- Isolates your turbo
- Helps to improve turbo response
- Helps lower under bonnet temperature

Sizes available:

754001 T2
754002 T3
754003 T4
754006 T6

RATED TO:
550°C

RATED TO:
700°C
