# ABOUT MITS

MITS Alloy was born from the ever-increasing amount of requests that were received for quality trays, canopies, toolboxes and service bodies that could stand up to the harsh abuse of work and mine sites. Over the last 5 years, the 'shed' has grown from a small single bay to spanning across multiple locations and a dozen buildings to incorporate linear production strategies and introduce advanced manufacturing techniques and procedures. MITS Alloy manages everything from powder coating to 12V installations, in-house. In 2020, MITS Alloy gained certified status as an Australian made product.

Throughout this expansion, product line refinements and extensive R&D programs that covered hundreds of thousands of kilometres means continual improvement across our product offerings. This real-world testing leads to innovative features not seen anywhere else in the sector and places MITS Alloy at the forefront of the tray and canopy market.

Partnerships with local material and hardware suppliers has supported local industry and jobs, and key alignments with other premium aftermarket accessory suppliers means the optional extras we supply are of the same quality that MITS Alloy customers expect.

Helping our customers realize their dream utility vehicle for work, play, or both, has become a reality for MITS Alloy not only here in Australia, but also in locations around the globe, including North America and New Zealand. Whether it is during the initial consultation stage, production of your new tray and canopy, handing over your pride and joy or listening to feedback and ideas in our after-sales support team, every MITS Alloy employee is as passionate as you about exploration and off road adventure. We are here to help you get the most out of your investment in your vehicle.

## EXPLORE WITH NO LIMITS!

# OUR NATIONWIDE NETWORK

Looking to make yours a MITS, but are not located around our showrooms in Newcastle, NSW or Brendale, QLD? We have dealers all over Australia to make sure you're able to get your hands on a MITS Alloy tray and canopy. Our packages are built in our headquarters and shipped to your selected dealer of ours, where they install the package. This means you get our lifetime manufacturers warranty and a simple process where all you have to do is drop the vehicle off and pick it up later!

Have all your 4WD gear fitted at the one place, so you can get our enjoying the wide open road quicker and easier. Explore with no limits!

# HOW TO PICK YOUR SETUP

We have made our products **modular**, so you don't have to be locked in to the same setup forever! The three steps below will ensure you get everything you need, and if you can't decide, that's ok because we can add to your epic setup at a later stage. Our range is also **compatible with other brands**, so reach out if you want particular products in your build.

<p><b>1</b></p> <p><b>PICK YOUR TRAY</b></p>	<p><b>2</b></p> <p><b>CHOOSE YOUR CANOPY SETUP</b></p>	<p><b>3</b></p> <p><b>DECIDE ON INTERNAL LAYOUT</b></p>
<p>First we start with your base! Manufactured from heavy-duty aluminium and built to handle the rigors of harsh everyday use, our trays are built to last a lifetime and make for the perfect base to build your dream package.</p>	<p>The canopy is where the customisation begins! We have a range of sizes, dependent on your vehicle use. Made from tough aluminium and created for flexibility when it comes to the layout of your vehicle, the possibilities are endless.</p>	<p>Now it's all about what you carry. Build an internal layout to suit your requirements and make it a dream to work and play from! The modular design means that you can change your layout when you need to.</p>

## THE MITS ALLOY UNIQUE UNISTRUT SYSTEM

### WHAT DOES THIS MEAN?

Simply, all of our internal accessories are bolt-in, meaning you can remove them quickly and easily with a 13mm socket should you need more space in your canopy or if your daily operation changes.

Not sure what you want? That's fine! Because all of our accessories bolt into our canopies, you can do the internal fit-out later on!
