Flat Bed Ute Tray

Constructed from durable and lightweight aluminium, the flat-bed ute tray provides a customised fit for MRT canopies, complete with flush combing rails and a 1000kg load-carrying capacity. The Companion canopy and tray package offers the option of a raw aluminium finish or powder coat for a sleek appearance that is tailored to your preferences.

MRT Canopy

Constructed from premium quality 5052 marine grade aluminium, the canopy has reinforced bracing that can support up to 300kg of static weight and 150kg of dynamic weight on the canopy roof. The fully seam welded construction, full-length piano-type stainless steel hinges, whale tail locks, stainless-steel striker plates, extra-thick rubber dust seals, and water deflector seals all contribute to the canopy's superior durability, security, and weather resistance.

X-Series Dog Box

Designed to perfectly align with the profile of the MRT canopy, the X-Series Dog Box boasts MRT's advanced slam shut locking system. This system enables a hassle-free finger-pull opening and secure slam-shut locking. Its laser-cut design is powder-coated to match your setup, ensuring a flawless integration. For those requiring extra space for a second pet, internal divider doors are available for an added fee, ensuring safe travel for two dogs.

Tailored Undertray Toolboxes

Tailored to fit each vehicle make and model, the underbody toolboxes that come with the Companion tray and canopy package present a streamlined and cohesive look that perfectly matches both the tray and canopy. When you opt for the Companion tray, dog box and canopy package, your underbody toolboxes are carefully matched to the finish of your tray and canopy, resulting in a seamless appearance that elevates the overall aesthetic of your setup.

Undertray Drawer

The MRT undertray drawer is a highly functional and seamless addition to your ute-tray setup. It is designed to fit seamlessly into the rear light bar, with finger-pull opening and slam-shut locking mechanisms for ease of use. The sturdy lid can be used as a workbench or makeshift kitchen, while the drawers provide versatile storage options for your camping or work needs. With its durable construction and practical design, the MRT undertray drawer is a valuable addition to any ute-tray setup.

Flared Mudguards

Featuring flared mudguards that extend 45mm past the tray on either side, the Companion tray ensures that your wheels and tires are completely covered in accordance with Australian legal requirements. Made from 3mm heavy-duty aluminium, MRT Flared guards offer the perfect blend of style and functionality. With a wider coverage than standard mudguards, this allows your tray and canopy to be kept sleek and in line with the body line of your ute whilst still giving the coverage over your wheels and tyres.

LED Tail lights

With the Companion tray, dog box and canopy package, you have the option to select from two distinctive LED tail light choices, each crafted to enhance the overall aesthetic of your vehicle. Whether you prefer the sleek rectangular design of the 284 model or the sophisticated shadow black tapered design of the 355 model, both options are equipped with eye-catching sequential indicators that offer an additional touch of style and customisation to your vehicle.

Keyless Entry System

The MRT keyless entry system is a revolutionary feature that offers the ultimate convenience and security for your vehicle. With this patent-pending system, you can effortlessly lock and unlock all your canopy doors using a single remote, saving you time and hassle. This innovative technology provides enhanced peace of mind by offering superior protection for your equipment, and is the perfect solution for anyone who values convenience and efficiency.

X-Series Ladder Racks

Maximise your storage capacity without sacrificing style with our X-Series canopy roof racks. The Companion tray, dog box and canopy package includes three individual racks, carefully designed to seamlessly integrate with your canopy and provide optimal storage space. With the X-Series canopy roof racks, you can easily transport additional equipment and gear for your next adventure or work project.

X-Series Platform Roof Rack*

Low-profile design engineered to eliminate clearance issues without compromising on strength or functionality. This robust yet lightweight roof rack features T-Channel slots for easy attachment of tents, awnings, and more, ensuring a sleek fit. Flush mounted for aesthetic appeal, it offers optional side rails for extra load support.

*Only included in X-Series Chassis Mount Package

Extra Dog Space or Extra Storage

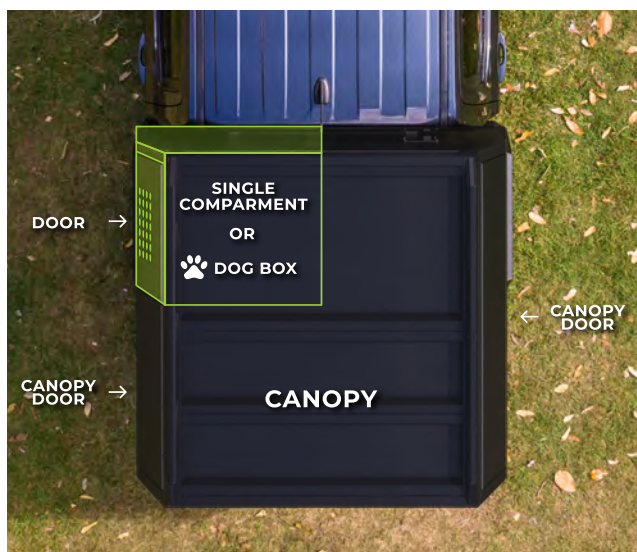

Available for **XSERIES** Chassis Mount Packages only

With this package, you are empowered to tailor your setup to meet your specific needs. Opt for an extra storage compartment for more space to secure your gear, enlarge your dog box to double its size for added comfort for your canine companions, or select dual individual dog boxes to accommodate multiple pets separately.
