

ECO-Tourer

**ON OR OFF ROAD,
ECOTOURER WILL GET
YOU THERE IN COMFORT**

ECOTOURER 510

BREEZE | SLIPSTREAM | HURRICANE

Wherever your journey takes you, the EcoTourer can take you there with feature-packed on and off-road models

Introducing the Australian designed EcoTourer, the sophisticated alternative to the traditional caravan or pop-top.

The EcoTourer has the unique ability to close to almost half its size so it can be stored in a household garage.

Its compact, sleek body improves the towing experience dramatically reducing the effects of side winds, allowing increased towing speed and reduced fuel consumption, giving you a much smoother and safer ride.

When you get to your destination, your EcoTourer is ready to give you a comfortable and relaxing experience. All EcoTourers are fully equipped so that you have all the comforts of home, configured for maximum space and built for ultimate durability.

So wherever you want to travel, there's an EcoTourer to suit your needs. It's a big country, so there's no need to do it the hard way. See it in style and comfort from an EcoTourer.

When you stop for the day

Your EcoTourer is ready to go. You can set up in just 40 seconds. You'll be relaxing with all the comforts of home in no time.

SETTING THE STANDARD SINCE 2002

The EcoTourer range undergoes constant development and improvement to ensure our world class design remains the best off-road and touring caravan available. We've set the standard since 2002 and will continue to do so for many years to come.

COMFORT, CONVENIENCE AND CONFIDENCE

The EcoTourer range is designed to give you peace of mind wherever your travels take you – and when you get home. That's because we know what Australians want from a van. It has to be reliable and built for local conditions. It must be comfortable and make great use of space through innovative design and the best material and components. And it must be great and lasting value, so that even after years of faithful service, your EcoTourer maintains maximum value, especially when compared to regular caravans.

Your adventure starts with a caravan that's designed and built for the journey

Constructed for Tough Conditions

The EcoTourer was designed and engineered in Australia for Australian conditions. EcoTourer assembly is carried out in a modern, purpose-built factory using a seven-stage procedure.

Low Profile, Aerodynamic Shape

EcoTourer's low profile shape is no accident. It gets you into places regular caravans just can't go, as well as improving fuel efficiency and reducing the effects of wind gusts when you're on the highway.

Graduated Chassis

Using sophisticated computer modelling, the EcoTourer chassis was developed to optimise strength where it's most required, with double hollow section beams around high stress areas that are hot-dipped galvanised, and tapered sections where applicable. This conserves weight while maximising strength. A patented folding drawbar is standard on all EcoTourers to reduce the overall length for storage. High grade 450MPa steel is used in the main load carrying areas of the chassis.

Walls

EcoTourer engineers chose double fibreglass skin, polyurethane sandwich panel wall construction because of its high strength-to-weight ratio, high impact resistance and stability in varying temperatures.

A stainless steel channel is built into the wall for mounting to the chassis. The high strength fibreglass skin is an ideal material for attaching the furniture. This construction method has been proven on thousands of truck bodies throughout the world over millions of kilometres.

Quality design and construction is everything

The home comforts of the EcoTourer range is no accident. We're a family company and we love to hit the road too. We know that at the end of the day, there's nothing like relaxing at a new site and enjoying all the benefits that the EcoTourer range is famous for.

Innovative Roof Design and Construction

The roof is constructed using a lightweight, one piece outer fibreglass moulded skin. This eliminates the traditional joints of caravan roofs which can leak if not maintained. The outer skin has seven structural beams bonded onto it. These beams also form the overhead cupboards. The remaining areas have 50mm polystyrene bonded into them and are finished with vinyl coated plywood ceiling panels. This integrated construction allows optimum control of weight while maintaining strength and rigidity.

Opening and Closing Mechanism

The mechanism for opening and closing the roof is a simple mechanical-linked jacking arrangement. The weight is balanced by four large coil springs. The movement is achieved by the use of jacks which incorporate recirculating ball screws to reduce friction. The mechanism is operated effortlessly by either a cordless drill or by hand winding.

Quality is Built-in

EcoTourer design is innovative, unique and built to last, wherever your journeys take you.

It's not only a source of great pride for us, we want you to enjoy your EcoTourer everyday and take satisfaction from the way it looks, its ease of maintenance and the comfort it offers when you're a long way from home.

From the external finish to the fabrics and material on the inside, even the raw materials and the running gear, you can sense that we use only the best quality materials from the world's best manufacturers. They're chosen for their durability and suitability so that your EcoTourer is always a source of great pleasure and that adds real value to your life on the road.

Furniture

EcoTourer furniture is built by skilled tradespeople, is highly durable and easy to clean thanks to the use of Formica laminate on interior and exterior surfaces. Hollowbox construction furniture is used throughout.

Positive push-button catches are used on all doors and drawers. All overhead cupboard doors are coated with gloss white two-pack paint to match the sleek fibreglass overhead cupboards for an integrated style that's durable and easy to live with.

Production of the EcoTourer began in 2002 after years of research, development, design and local engineering

EcoTourers were originally built in our small Melbourne factory until demand increased to the point that an alternative solution was required. Today our entire EcoTourer range is assembled in southern China using parts mainly sourced in Australia with the addition of some accessories.

Pre-delivery takes place at our Melbourne factory. Quality control is closely monitored during regular factory visits while design and component improvements are an important ongoing process.

Over the years the range of EcoTourers has grown with the introduction of the Hurricane (off-road) model and more recently, the Slipstream (hybrid) model. The development of the shower/toilet floor-plan was the major advancement in the range and when added to the Hurricane model, it became the popular choice of customers.

Don't wait to explore

There's so much to see and do in this amazing country. See it in comfort with the EcoTourer.

EcoTourer is for real travel opportunities

The EcoTourer was designed and engineered with touring Australia in mind. No compromises, just a tough, modern design that takes you where you want to go in comfort and with confidence.

We love to travel this great big country and when we designed the EcoTourer we knew we would deliver a new kind of van to the market. We wanted to innovate and to create new travel opportunities for our customers that just weren't available from old-fashioned caravans

and campers. We wanted to offer a van that was great value for money, that was designed and built right from the start, and that was easy to own, whether on the road, or parked at home.

This means using and maintaining your EcoTourer is as stress-free as possible.

Planning a long overdue cross-country exploration, or a 'pack a bag and we're off' weekend escape, you can do it all with the EcoTourer. For casual trips or an expedition, EcoTourer is your perfect travel partner.

ENJOY ALL YEAR ROUND TRAVEL

Australia is a big place with an enormous range of terrains and travel options. From friendly caravan parks to distant, and remote spots still waiting to be discovered, your EcoTourer is your travel partner. Long overdue holidays or a spur of the moment break, EcoTourer's compact design means there are few places in this great country you can't enjoy whatever time of year.

EcoTourer is designed from the ground up for functionality, reliability and lasting value

BUILT FOR SAFETY AND COMFORT

EcoTourer features fully insulated walls, double fibreglass skins and polyurethane insulation for the most comfortable rest when you're at your destination.

DESIGNED FOR FUEL EFFICIENCY

The design of the EcoTourer range is no accident. Designed not just for longevity and ease of operation, the EcoTourer is also designed for economical touring with its aerodynamically efficient design and smart material choices which make big contributions to fuel savings.

UNBEATABLE RESALE

EcoTourer's reputation for quality, ease of operation and ruggedness is matched by its excellent resale value.

HIGH QUALITY, INTERNATIONALLY AND LOCALLY SOURCED COMPONENTS

You know the EcoTourer is famous for quality and robust construction. That's because they're built with only the best local and international components and materials available.

FITS IN STANDARD GARAGES

No need to park in expensive rental spaces, EcoTourer is easy to move, single axle, standard folding drawbar. Only 2.3m wide with awning so it won't take over your garage.

TESTED FOR LONG RANGE AND HIGH SPEED

It's a big country and EcoTourer is designed for reliable on and off-road travel, and safe travel on-highway with superior design and unmatched aerodynamics.

LIGHTER AND STRONGER CHASSIS

Because EcoTourer is constantly under development and improvement, it's now constructed with a lighter and stronger chassis for even better durability and improved fuel consumption. All structural beams are made from Australian 450MPa steel.

LOW-STRESS DRIVING EXPERIENCE

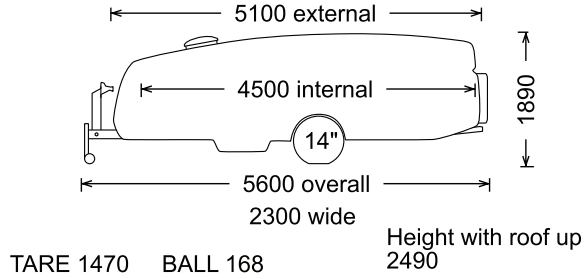

There are times when towing is a real drag. EcoTourer is designed to minimise the pressure of having a caravan. Even at speed and in the wind and rain, the low centre of gravity makes getting to your next destination a pleasure.

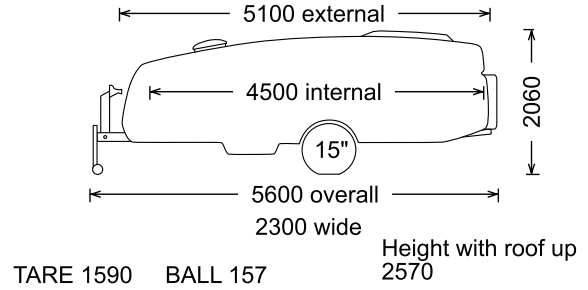

ECOTOURER BREEZE

The lowest height and the lightest weight. Ideal for storage in low garages. It's all about relaxed and safe travel.

BREEZE SINGLE BEDS / DOUBLE BED

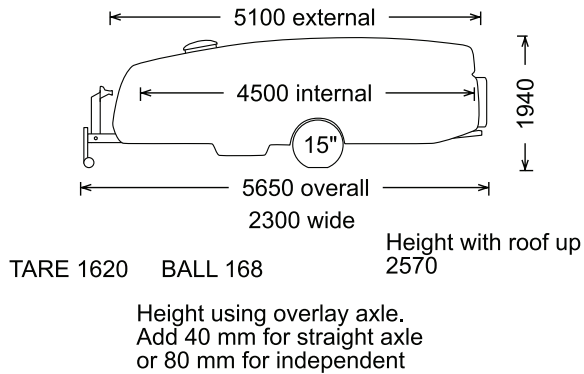

BREEZE SHOWER / TOILET

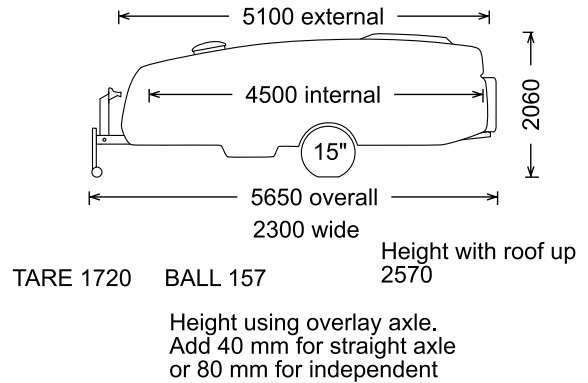

ECOTOURER SLIPSTREAM

Extra ground clearance and features ideal for most SUVs. Built for free camping adventures.

SLIPSTREAM SINGLE BEDS / DOUBLE BED

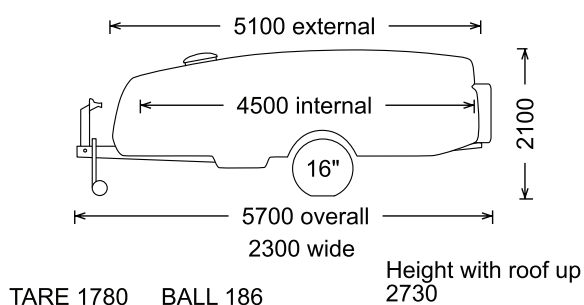

SLIPSTREAM SHOWER / TOILET

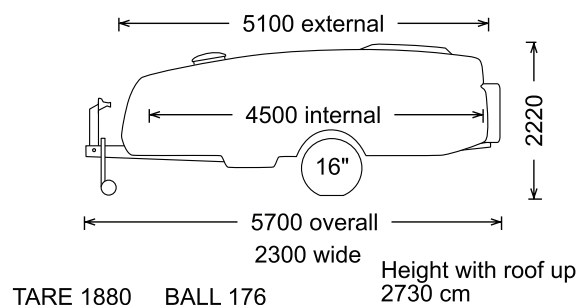

ECOTOURER HURRICANE

Built with outback travel in mind, while still looking great in town. High ground clearance and its low, sleek roof gets to places others can't.

EcoTourer Specifications

Single or Double bed layout

Breeze

- aerodynamic shape provides significant fuel savings and towing comfort
- low centre of gravity
- hot-dipped galvanised chassis
- cutaway rear underside
- fold-up A-frame saves 0.9m length for storage
- Camec acrylic wind-out windows
- huge panoramic front window
- Fiamma awning with centre rafter
- roof hatch with 12v fan
- four corner stabilisers
- wide track axle

WHEELS AND SUSPENSION

- 195R14C light truck tyres
- 14 x 5½ inch alloy rims
- 10 inch electric brakes
- leaf spring, eye to slipper
- Slumberest innerspring mattress
- Dometic CRX100 fridge
- microwave oven
- 24" LED TV with built-in DVD player and ceiling bracket
- Winegard Sensor HV TV antenna
- AM/FM radio with Bluetooth interface and audio input from TV
- gas stove with glass lid
- flush sink with glass lid
- 12v water pump
- water level indicator
- seven 12v LED ceiling lights
- two 12v LED reading lamps over bed
- external 240v outlet
- external 12v LED light

Breeze Shower & Toilet

- All **standard** features plus the following:
- moulded fibreglass shower room
 - step down floor for additional head room
 - Thetford cassette toilet
 - Truma Ultra Rapid gas/240v water heater
 - additional water tank with filler
 - separate vanity basin with hot/cold mixer tap
 - hot/cold mixer tap to kitchen sink

WHEELS AND SUSPENSION

- 225/70R15 light truck tyres
- 15 x 6 inch alloy rims
- heavy duty bearings / six stud hubdrum
- 12 inch electric brakes
- solid axle, leaf spring, eye to eye

Slipstream

- All **standard** features plus the following:
- advanced battery charging system with battery monitoring and AC/DC charging while towing
 - 1 x 150AH lithium battery
 - 1 x 145 watt solar panel
 - 50 amp Anderson plug to charge the battery while towing
 - adjustable front stone deflector in stainless steel frame
 - checker plate side skirt
 - checker plate lined wheel box
 - provision for additional water tank
 - additional roof seal for greater dust protection
 - grab handle beside door
 - external towel rail fitted to off-side wall
 - side folding wall supports
 - stone protection on plumbing

WHEELS AND SUSPENSION

- 225/70R15 light truck tyres
- 15 x 6 inch alloy rims
- heavy duty bearings / six stud hubdrum
- 12 inch electric brakes
- Solid axle, leaf spring, eye to eye

Slipstream Shower & Toilet

- All **standard** features plus:
- All **shower and toilet** features plus:
- All **Hybrid** features plus the following:
- aluminium checker plate protection on shower base

WHEELS AND SUSPENSION

- 225/70R15 light truck tyres
- 15 x 6 inch alloy rims
- heavy duty bearings / six stud hubdrum
- 12 inch electric brakes
- solid axle, leaf spring, eye to eye

Hurricane

- All **standard** features plus:
- All **Hybrid** features plus the following:
- heavy duty tapered chassis with greater ground clearance
 - galvanised steel side protection rails
 - extended A-frame
 - DO35 Hitchmaster coupling
 - advanced battery charging system with battery monitoring and AC/DC charging while towing
 - 2 x 150 AH lithium battery
 - 2 x 145 watt solar panels

WHEELS AND SUSPENSION

- 245/75R16 light truck tyres
- 16 x 7 inch alloy rims
- Cruisemaster 2600kg rated independent coil suspension, heavy duty bearings, twin shock absorbers on each side

Hurricane Shower & Toilet

- All **standard** features plus:
- All **shower and toilet** features plus:
- All **Hybrid shower and toilet** features plus:
- All **Off-Road** features plus the following:

WHEELS AND SUSPENSION

- 245/75R16 light truck tyres
- 16 x 7 inch alloy rims
- Cruisemaster 2600kg rated independent coil suspension, heavy duty bearings, twin shock absorbers on each side

Shower and Toilet layout

The EcoTourer range has been developed by the Hawkins family since 2002, employing three generations dedicated to making the most of Australia's beautiful landscapes and destinations. They have gained unmatched

experience and knowledge and have firsthand knowledge of how to see this vast continent in comfort and security.

As you'd expect for a caravan designed to reach Australia's distant locations, the

EcoTourer range is designed with local conditions in mind, using only the best Australian and internationally sourced components for reliability, low maintenance and excellent durability.
