* Excludes Limited Edition Tours

Learn More

All Passes, Permits and Bookings.
We take care of all passes, permits and bookings, which are included in your tour price, so you can enjoy hassle-free holiday planning.

Vehicle Prep and Packing Guides.
After booking, you will receive comprehensive vehicle preparation information and packing recommendations to help ensure your vehicle and passengers are well prepared for your tour.

Training, Support and Assistance.
Throughout your tour, your experienced guide will share off-road driving techniques and tips on navigating obstacles, and can provide vehicle recovery assistance if needed.

Fully Guided Tour Experience.
We take care of research, route planning and risk assessments and we lead the group each day. All you have to do is follow us to see all the highlights of your chosen tour.

Suitable for Trailers

Tyre Pressure Guide.

Terrain	PSI	Remarks
Sealed Road	38	Or higher to suit vehicle mass, towing, etc.
Snow (unsealed road)	32	Maintain sealed road pressures if on road
Unsealed Road	28	Can lower to 25 PSI if corrugations are bad
Mud or Rock	22	
Sand	18	Lower further to suit conditions

- Recommended pressures are for cold tyres.
- If pressures increase by 6 PSI or more while driving on sealed road, cold pressures are too low. Add 2-3 PSI.
- When off-road, lower tyre pressures on trailers to 4 PSI less than the rear tyres on the tow vehicle.
- Pressures of 10 PSI and below risk breaking the tyre bead. Use caution.

UHF Channel Guide.

Channel/s	Use
