9" LED DRIVING LIGHTS

HYPERION™ LED DRIVING LIGHTS

DLHPR9

Designed fully in-house and with every detail considered, the Hyperion LED Driving Lights let you *control the night*.

Using a completely **new reflector design**, the light is the ideal representation of a combination beam. We've been able to achieve a **full field of view illumination** with a thoroughly consistent gradient of luminance ahead of you, making the journey **safer and less straining** on the eyes.

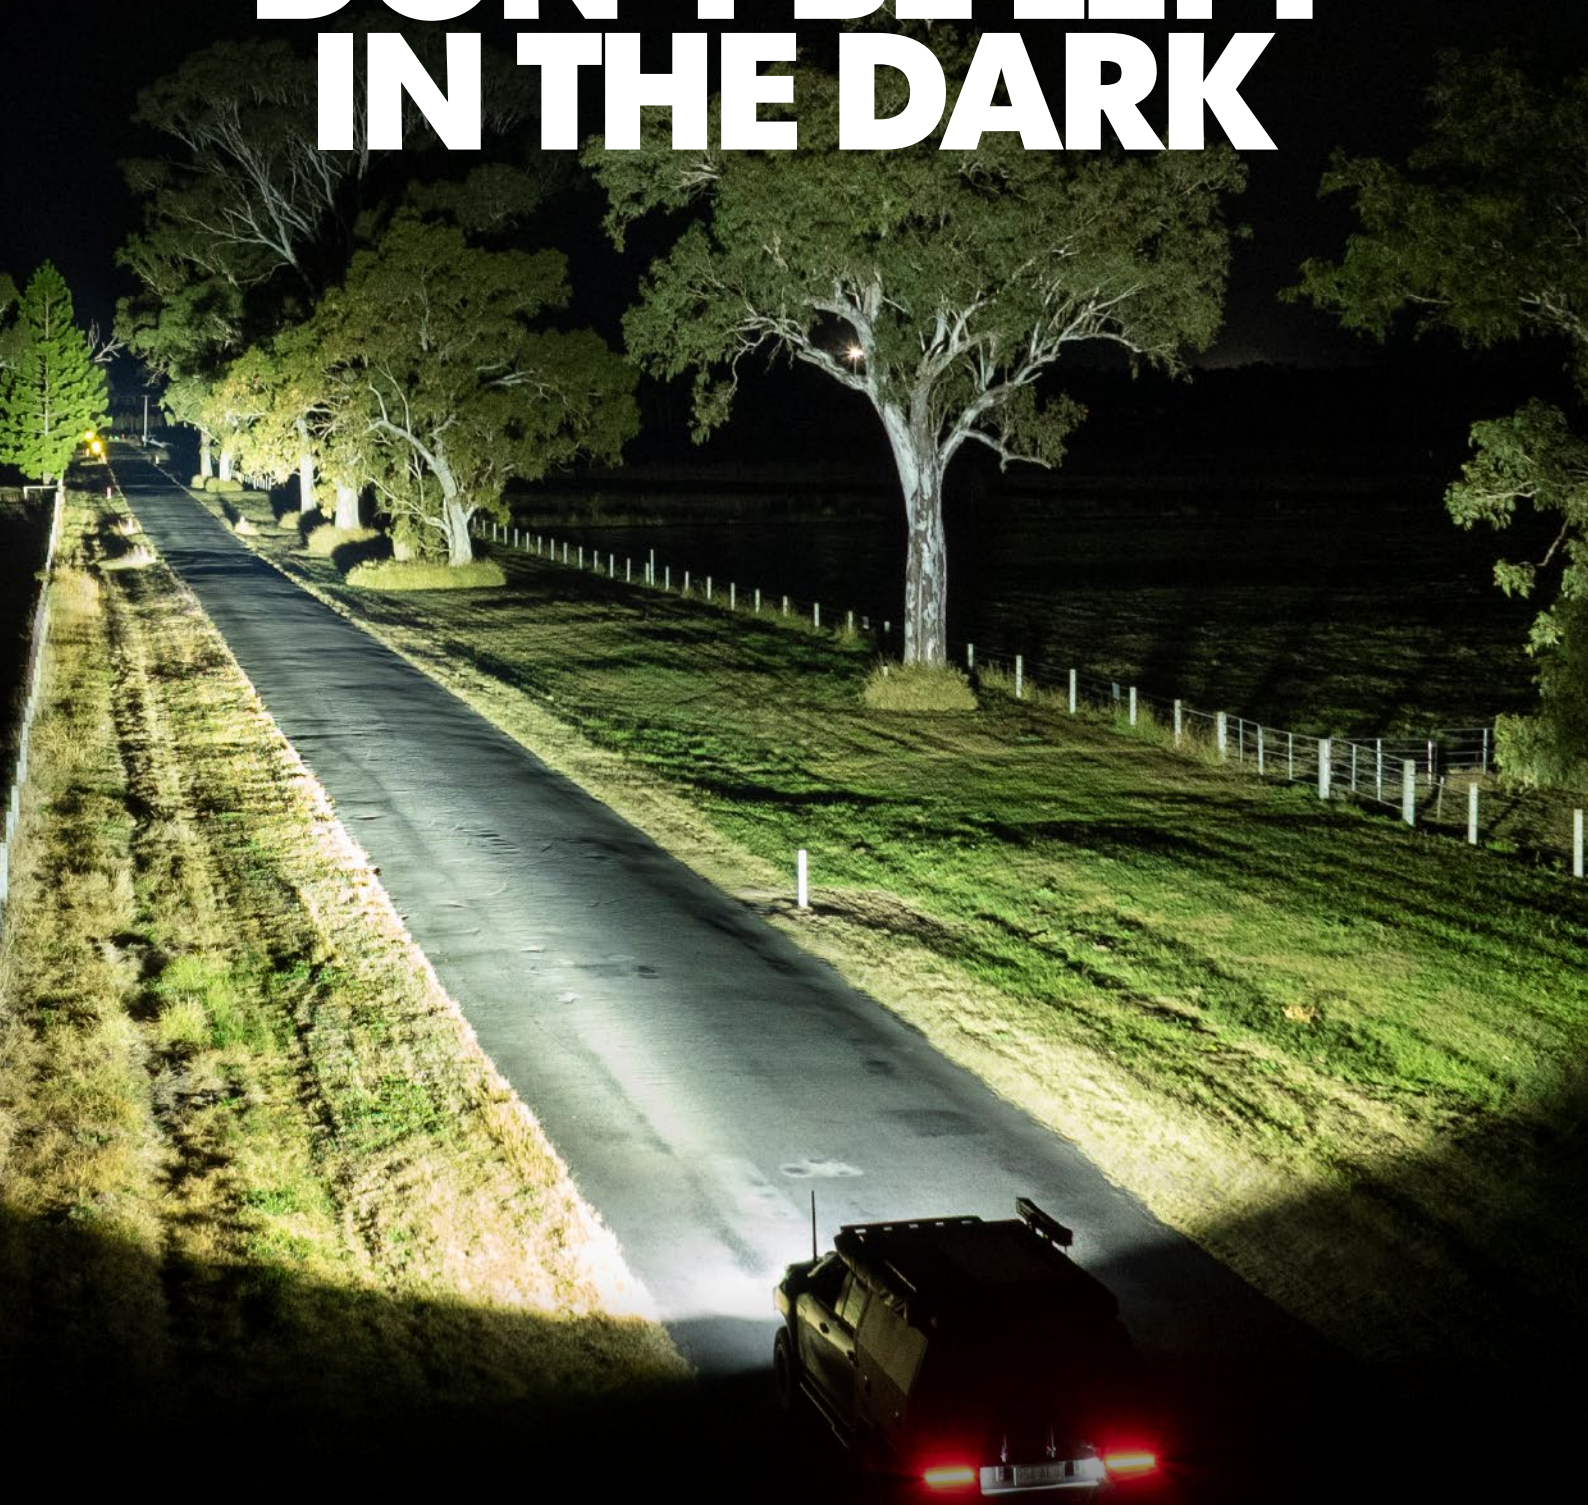

Each box comes with a pair of 9" lights, wiring harness, mounting hardware, covers, and alternate accent rings.

To complement the performance, the light has a radically **elevated design language**, closely considering the shape, surface finishes and how the light integrates with modern vehicles entering the market. Feast your eyes on the new Hyperion LED Driving Lights.

Lumens (pair)	22,000lm
1-lux distance (pair)	1,183m
Beam angle	110°
Colour temperature	5,500K
Ingress protection	IP68/9K
Power (pair)	23.8A at 12V / 11.9A at 24V
Weight (pair, incl. hardware & harness)	7.2kg
