

ADVENTURE DRIVEN™

ISUZU D-MAX MY2020

A NEW GENERATION OF TOUGH

SAY HELLO TO THE NEW BAR IN TOWN

Opposite Lock's new premium steel bull bar for the ISUZU D-MAX MY20 has been designed to handle Australia's toughest terrain, whilst keeping safety and the vehicle's inbuilt intelligent systems at the forefront.

From the initial sketches, the Opposite Lock R&D team has focused on ensuring that any addition to the ISUZU D-MAX needs to be built to a standard that feels like it is part of the vehicle and shaped to fit smoothly.

Incorporating the high number of safety and tech features of the D-MAX, you can be confident that your vehicle will perform to ADR standards and provide the maximum protection to your vehicle and your family.

With high approach angles and rigid strength, this bar allows you to challenge the tough terrain and fit out all the accessories you need to conquer your journey.

The Opposite Lock Premium Bull Bar equipped to your D-MAX is the most reliable way to escape the everyday, in true essence of being Adventure Driven.

DESIGN MATTERS

Tasked with providing a slim fitting bar that works with the curves and shape of the D-MAX, Opposite Lock's design team have developed a contemporary bar that has been formed, folded, and engineered that performs when needed – but also looks the part.

BAR BENEFITS

The Opposite Lock Bull Bar has evolved to travel every journey – from day-to-day driving to tackling some of the most extreme adventures.

Recessed LED indicators are packaged with the bar and designed to reduce the risk of damage

Three CB aerial mounts, ideal for UHF, Phone Aerial and Sand Flag - two located on the passenger side, one located on the driver's side – with each mount utilising a quick fit cut out so additional accessories can be easily installed later

Fog lights can be interchanged with halogen or LED to create the style you are looking for

Driving Light Mounts are Standard, to allow fitting of our wide range of driving lights

Hi lift jack points conveniently located under the overriders for stability and strength

The location of the winch and fairlead has been designed with accessibility for when you need it most. The low winch mount allows for optimum vehicle recovery and is built to suit a wide range of popular winch models
