Why Solid GPS

We started as two local Australian riders looking for a way to protect our bikes.

Then we discovered that too many vehicles in general were being stolen in our community.

After some investigation, we knew GPS trackers were the solution.

But a lot of trackers were too complex, expensive or untrustworthy. Hurting you, more than anyone else.

We knew there could be a better way, so we built Solid GPS.

What is Solid GPS?

Solid GPS is a GPS tracker that just works.

Your vehicle is tracked every time it moves with location updates every 2 - 5 minutes.

You can set boundaries around your home, work or anywhere and get alerted when your vehicle enters/exits those areas.

And everything is included, from our 4G SIM card to a super-long battery life with no wiring involved.

What The People Say

“SolidGPS is so small and easy to use. By having it in my Hyundai Accent, it gave me peace of mind knowing that I could easily track my car in case it was stolen.

- Riz A

“What a brilliant GPS tracker. It is super easy to operate, really easy to use and has a great dashboard. Really easy to purchase. It is also Australian owned and operated, and competitively priced.

- Peter S

“After a lot of research I purchased the Solid GPS. Great value, simple to operate. Excellent and quick backup service. I highly recommend this unit.
