

Letter of Introduction

Thank you for taking the time to learn a little more about the Minelab range of metal detectors. We are Miners Den Australia, the largest and only network of Minelab Metal Detector Superstores in the country. Miners Den Australia specialises in sales, service & training on the Minelab range of world class hand held metal detectors. We don't sell any other brand of detectors and we pride ourselves on providing superior service and advice to both the new chums and existing prospectors.

For your convenience, we also have all products available for purchase on our regularly updated website www.minersden.com.au.

Our network, with stores in Melbourne, Bendigo, Sydney, & Adelaide are all staffed with Minelab certified customer service staff and carry most of the Minelab range of metal detectors in stock. As well as the Minelab range of metal detectors we also carry one of the largest ranges of prospecting accessories including Nugget Finder & Coiltek prospecting and coin & relic search coils, Walco picks and a large range of popular gold pans and panning equipment.

To assist you in locating prospective areas to search we stock a large range of goldfields books & maps. In addition, we also have a range of Informative DVD's and how to guides to help you get the maximum benefit from your time in the field.

Simply put, we are your one stop shop across eastern Australia for the best advice service and value for money when purchasing prospecting equipment.

Should you need any assistance in either beginning or continuing the hobby of gold prospecting or treasure hunting please visit our website www.minersden.com.au to see when our next demo day is.
