BRAKE BOOSTER UPGRADE

Introducing the **Bendix Ultimate 4WD Brake Booster Upgrade**, an essential addition for 4WDs towing or carrying heavy loads. With this easy-to-fit upgrade, braking performance is increased by up to 30%.

The **Bendix Ultimate 4WD Brake Booster Upgrade** uses dual-diaphragm technology and is ADR compliant. The upgrade has been designed to be a direct 'bolt-in' replacement for original equipment (OE), single-diaphragm brake boosters.

4WD vehicles fitted with added mass and larger-diameter tyres require higher brake pedal pressure for effective braking.

Brake pedal pressure required and braking effectiveness (including improved stopping distances) can be achieved by fitting a dual-diaphragm booster.
