ABOUT US

Piranha is proudly a 100% Australian owned manufacturer and distributor of highly specialised products for the off road 4WD industry.

Piranha began as a family owned business. Traditional business values of excellent service and client satisfaction are essential to Piranha's business philosophy today. All staff take time to talk with you and advise on the best solution for your vehicle.

With over 30 years in the 4WD market, you are dealing with experts and leaders in the industry.

Today, Piranha has stores and distributors located throughout Australia with their main aim: to provide you with the best and most reliable products for your 4WD needs.

Piranha Off Road is a manufacturer and distributor of after-market off road accessories and other products. Piranha Off Road makes no representation that it has an affiliation with, or sponsorship or approval from, any car manufacturer. Any use of the names of car manufacturers or models are used only to describe the suitability of Piranha Off Road's products with the relevant manufacturer.

03 | PREMIUM ALUMINIUM UTE TRAYS

Piranha Premium Aluminium UTE Tray is designed using advanced computer modelling and field tested extensively to withstand harsh Australian conditions.

Excellent Features

PIRANHA PREMIUM ALUMINIUM UTE TRAYS include many standard inclusions like a one piece aluminium checker plate floor, heavy duty steel runners with inbuilt under tray draw mounts for easy under tray drawer fitment, as well as lashing points and provision for a ladder rack.

- ✓ Heavy duty TIG welded aluminium tray deck
- ✓ 250mm high sides, with TIG welded end caps
- ✓ One piece aluminium chequer plate floor with 4 lashing rings
- ✓ Built in tracks for relocatable load rings
- ✓ Laser cut aluminium safety mesh
- ✓ 76mm diameter aluminium headboard tube with ladder pins
- ✓ Aluminium mudguards with mudflaps
- ✓ Tail light protectors
- ✓ Heavy duty hinges
- ✓ Heavy duty mounting system
- ✓ Quick release overcentre latches
- ✓ Continuous 32mm diameter down rope tails
- ✓ Removable rear rack - Optional extra
- ✓ Wide heavy duty undertray roller drawer - Optional extra

Available Colours

Mill Finish Black

Built Extra Tough

Our Premium Aluminium tray can be shipped as flat pack if required, with any competent DIY person should be able to assemble it in less than an hour.

Dual Cab Short	1500Lx1825Wx260H
Dual Cab Wide	1800Lx2050Wx260H

Designed using advanced computer modelling and field tested extensively to withstand harsh Australian conditions. Sizes to suit most makes and models

Excellent Features

PIRANHA STEEL UTE TRAYS are made from high tensile folded steel for strength and light weight. We use pre galvanised steel in manufacture of our steel trays to prevent rusting even if the top powder coating is scratched.

- ✓ Heavy duty high tensile deck
- ✓ 250mm high sides
- ✓ Chequer plate floor with 4 lashing rings
- ✓ Laser cut safety mesh
- ✓ Tail light protectors
- ✓ Mudguards with mudflaps
- ✓ Heavy duty hinges
- ✓ Quick release overcentre latches
- ✓ Heavy duty mounting system
- ✓ 76mm diameter headboard tube with load holding pins
- ✓ Continuous 32mm diameter down rope rails
- ✓ Removable rear rack - Optional extra
- ✓ Wide heavy duty undertray roller drawer - Optional extra

05 | FIBREGLASS CANOPY

The **Fibreglass UTE Canopy** has a stylish aerodynamic body design with integrated spoiler & LED brake light, tinted windows, roof rails, powerful gas struts, interior LED light, carpet lining, and central locking to the rear window as standard.

Window Features

The windows on our **PIRANHA CANOPIES** are not only sleek but strong and protect from the outside elements.

- ✓ Tinted side glass windows with your choice of side dual sliding or lift up windows or any combination of both.
- ✓ Front Sliding window allows you to clean the rear window of the ute and also lets in extra air for your pets on those long trips.
- ✓ The rear window is Tinted, Heated and has central locking standard so never forget to lock your canopy again.

Security is Priority

PIRANHA CANOPIES are designed to be safe, reliable and secure.

- ✓ High quality two sided central locking handle on the rear and side window locks are all keyed alike.
- ✓ Made and assembled with high-quality parts and raw materials which are controlled under ISO9000 and ISO14001.

Color Options

PIRANHA CANOPIES are painted in Australia to match the colour code of the vehicle.

Please note: the process of matching the colour code is not the same as colour matching. Due to environmental factors such as fading, we cannot guarantee the paint job will be the exact same paint colour as on your car. To get the closest match, we recommend leaving your fuel cap with us so we can get the closest match to your car. Call us on (03) 9762 1200 for more information. (Additional charges may apply).

Finest Fibreglass

The **PIRANHA** canopy protects and shelters everything in the back.

Strong & Lightweight

Made with high quality 3-Layer fibreglass and reinforced composite.

Aerodynamic Design

Reduced drag gives better fuel economy.

Non-corossive

Able to resist temperatures up to 80c and below -20c.

Smooth Surface

Ensures the highest quality paint job to fit on your ute seamlessly.

Other Features and Benefits

- ✓ Integrated spoiler with LED brake light and LED cabin light (no wiring/ Battery operated)
- ✓ Fixed roof rails with a 100kgs load rating.
- ✓ Automotive carpet inner lining.
- ✓ Water resistant EDPM bed seal.

Piranha DC-DC 30 Amp Battery Charger with Solar Input

The DBDC1230S DC to DC Booster Battery Charger is a 30 Amp 3 stage unit with solar input to charge your auxiliary battery. With a metal case, sealed circuit board and special coatings to resist corrosion and water damage the DBDC1230S provides enhanced protection from moisture, vibration and dust.

Charge your lithium, sealed lead acid, vented lead acid, AGM or lead crystal batteries with selectable output voltages.

SCAN TO DOWNLOAD
DBDC1230S
MANUAL

This Dual Battery Monitor is designed to provide a guide indicating voltages on your Main and Auxiliary batteries in a dual battery set up or just a Main or just an Auxiliary when used in a single battery set up.

DBM5D Dual Battery Monitor

Includes MIDI Fuse

DBE140SF INTELLIGENT DUAL BATTERY MANAGEMENT

The DBE140SF Electronic Isolator offers most of the important features of the DBE180-SX. This unit has been redesigned, upgraded, and improved to suit modern vehicles.

Brass nut and bolt (nickel plated) connections for battery cables make the unit simple to install. They also give the option to easily upgrade an old or inferior isolator while using existing wiring.

DBM4 LOW VOLTAGE CUT OUT / BATTERY MONITOR

The microprocessor controlled design provides superior reliability & accuracy as well as super low power consumption (ONLY 6ma) when in idle state. It also extends battery life by limiting how much power can be drained from the battery with indicated Voltage for both the AUX and Main batteries.

DBAOC Alternator Output Compensator

The AOC used in conjunction with a Piranha Dual Battery Manager (DBE140SF) provides a technically superior solution to charging your AGM auxiliary battery, at a fraction of the cost of using DC/DC step up chargers.

AOC should be fitted by a qualified person and only after checking existing charge rate.

DUAL BATTERIES

AUXILIARY BATTERY SUPPORT TRAYS

Piranha have over 150 different battery trays

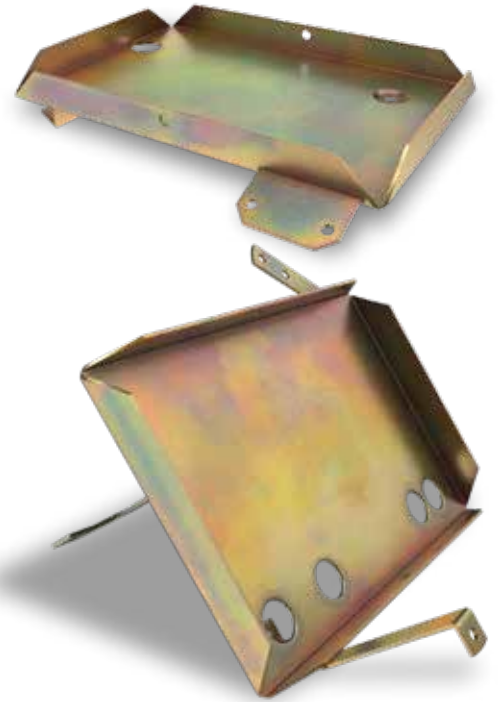

Piranha manufacture, right here in Australia, the most extensive range of electroplated steel (not plastic) auxiliary trays of any company today and our products are engineered to high standards to ensure reliable operation in tough Australian conditions. Not only do we make auxiliary trays, but some replacement trays for original equipment units.

Piranha Battery Trays

Piranha battery trays are made of 2mm thick mild steel with a thick 8 to 12 micron zinc electroplate plus a Chromate Conversion (gold) electroplated top coat. Accessories for the tray (body washers and top mounts etc.) are also electroplated to the same standards.

This produces a remarkably strong and reliable tray made to the highest quality and standards.

Piranha have invested a large amount of time and money to produce the best battery trays at the best possible prices. We manufacture over 150 trays for all major 4WD models, with detailed fitting instructions and support available. All trays come with a 2 year or 5 year, unlimited kilometre warranty (see warranty statement).

Why buy a Piranha Battery Tray?

1. The Largest Range

The largest range of auxiliary battery trays in the southern hemisphere.

2. Purpose Built

Over 150 purpose built trays specifically designed to fit your vehicle.

3. Plated Not Painted

Electroplated not painted or powder coated. Plating gives the best protection bar none.

4. Fit Largest Capacity Auxiliary

Engineered to hold the largest Auxiliary battery that's safe to fit without compromising the structural integrity of your vehicle

5. High Quality Nuts & Bolts

High quality hardware, high tensile grade 8 nuts & bolts, quality J bolts & custom built top mounts to suit most trays.

6. Full Instructions / Tech. Support

Full installation instruction sheets supplied and technical support available.

7. Made in Australia

With Australia wide distribution

8. 2 Year Unlimited Km Warranty

2 year unlimited kilometre warranty (TRADE ONLY) - conditions apply.

9. 30 Years Manufacturing Experience

Over 30 years manufacturing experience by a 100% Australian company.

10. Great value for money!

"Best battery for application" is Piranha's recommended battery for auxiliary tray & vehicle

BATTERY TRAYS

Leaf Spring

1. Thinned Diamond Cut Leaf Ends for optimal ride performance and less friction

2. Military Wraps for additional strength (where applicable)

3. Bolt Clips to prevent separation of leaves in articulated situations

4. Anti-friction liners are installed between leaves to provide a consistent, quiet and smooth ride

5. Anti-friction liners installed to clip liners to reduce noise and vibrations caused from the use of the spring.

All Leaf Springs are available in a number of different load carrying options as well as our comfort range for those vehicles not used for carrying loads. Most leaf springs are designed to provide up to a 50mm lift over the factory ride height.

Piranha have one of the largest range of leaf springs available in Australia for 2 & 4wd vehicles, available in traditional multi-leaf and parabolic (selected models only) with a variety of different spring rates it to suit many different applications it makes it easy to get the right spring for your requirements. All springs follow a strict manufacturing procedure that ensures springs eyes are perfectly rounded, all springs are scragged during production to ensure the longest life possible and then finished in durable paint to 35 micron.

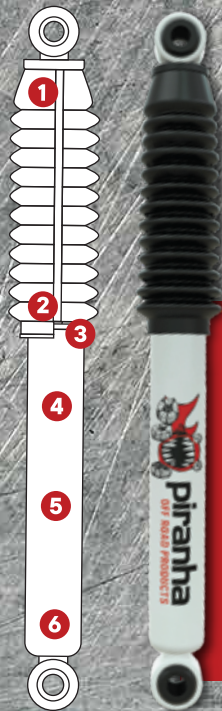

Parabolic 4x4 Springs Now Available!

The design of our Parabolic Leaf Spring allows for load-carrying capabilities without compromising on comfort whether loaded or unloaded, designed specifically with the recreational 4x4 user in mind providing a 2-inch lift and perfectly suited for the vehicle that is used daily to cart the family and then getaway on the weekend camping and off-roading, they will also provide more articulation in an off-road situation again loaded or unloaded. Completed with clip liners and inserts between the springs for less noise and more comfort.

| 3. Teflon Wear Band | 7. Alloy Adjuster Dial |
| 4. Sintered Piston | |

Coil Springs

A coil spring is basically a more modern version of the leaf spring. It still supports the weight of the vehicle and is available in both a single and progressive stage in some applications. It will provide a smoother ride than a leaf spring, generally found in 4wd wagons, both front and rear.

Our well designed coil springs are made in Australia and offered in a number of different load carrying options to suit the requirement for each vehicle.

- Made in Australia of high-stress X5K spring steel
- Finished in high-quality epoxy powder coat
- Shotpeened, scragged and load tested to prevent spring sag
- Heat treated and rolled at heat
- Available in a number of different load carrying and height options

Upper Control Arms

- Built in caster & camber correction for raised vehicles
- Fixed position heavy duty greaseable ball joint
- Powdercoated steel construction
- Built in provisions for relocating OEM ABS lines (where required)
- Available for Ranger, Dmax, Colorado, Triton, Pajero Sport, Navara, Hilux, Fortuner and Cruiser

STEERING DAMPERS

The steering damper is the shock absorber of your steering. It is designed to dampen the shock load caused when your vehicle hits a hole or bump in the road, reducing the shimmy and vibration. Piranha Off road offers high-quality foam cell steering dampers for a wide range of vehicles.

TORSION BARS

Piranha Torsion bars offer an increased rate over factory torsion bars, which will also deal with the additional accessories fitted to your vehicle.

STRUT MOUNTS

Piranha offers replacement strut mounts for a wide range of replacement strut mounts for a wide range of vehicles, manufactured as a direct replacement to the original.

POLYURETHANE LEAF SPRING BUSHES

Piranha Off Road recommends Polyurethane bushes for use with our range of greaseable swing shackles and fixed pins.. Designed and manufactured in Australia, these bushes feature grooves for grease distribution and retention providing an extended life for all of the moving components.

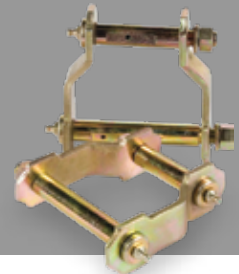

U-BOLTS

A very important part of the suspension on the leaf spring vehicles is the u-bolts. These u-bolts effectively hold your leaf springs onto the differential housing, keeping everything together. It is important to replace the u-bolts when the springs are removed or replaced. U-bolts are made specific to your vehicle and spring combination, and are finished with a zinc coating for superior corrosion resistance.

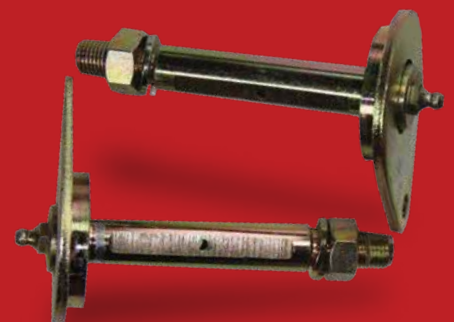

GREASEABLE SHACKLES

Greaseable swing shackles are an important part of the leaf spring suspension system. They attach to one end of the spring allowing for the leaf spring to work through length changes during suspension articulation. Shackles are made of high-quality steel and are zinc coated for superior corrosion resistance. By being greaseable, they offer extended life. These are always best used with our Polyurethane bushes.

GREASEABLE FIXED PIN

The greaseable fixed pin is used to attach the leaf spring to the vehicle at the opposite end to the swing shackle. Our greaseable fixed pins are made of high-quality steel then zinc coated for superior corrosion resistance and greaseable for extended life. These are always best used with our Polyurethane bushes.

LIGHT BARS

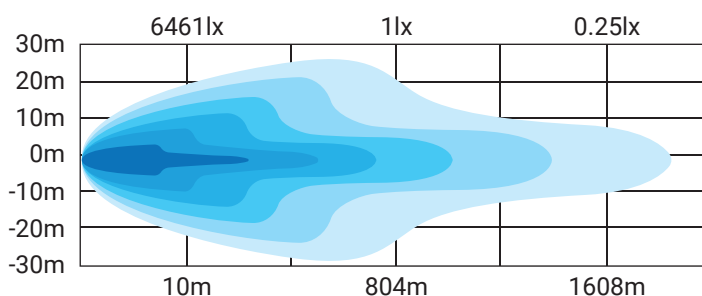

Lightbars are a very popular alternative choice these days and not only for 4WDers – road cars, boats, ATV's, agricultural equipment – wherever powerful light in a compact format is required. Many people are opting for one light bar being fitted on a nudge bar or bumper on street driven vehicles for safer vision at night. Light bars provide outstanding light, whilst being small enough to fit on most vehicles.

It's not just how good these light bars look; it's what goes in them that makes them special. These lights are good for the usual 12 volts, or trucks running 24 volt electricals. The thermal management system provides maximum light whilst protecting the light from overheating. EMC/EMI suppression means no radio or other electrical interference will impact the driving experience.

Piranha's ethos of 'rugged and reliable' holds true with these light bars. They are built tough with die-cast aluminium housings, OSRAM chips, excellent curved reflector design, high impact sleek rimless design polycarbonate lenses and black powder coated stainless steel mounting brackets and stainless steel bolts included.

There are two light bar lengths available – 22-inch and 30-inch, both in 'combo' beam patterns. This combined pattern gives best of both worlds – serious light down the road and more than decent spread out to the sides.

In fact, the bigger 30-inch unit pushes 1 Lux of light over 925 metres, whilst the smaller 22-inch light has a still impressive range of just over 800 metres @ 1 Lux. That's comparable to or better than some dedicated driving lights!

DRIVING LIGHTS

Driving light technology has changed markedly over the years – do you remember when HID lights were all the rage?, Piranha had the CAT Series back then, but now with advances in LED chips and performance characteristics of reflectors, getting a driving light to light up the night is easier than ever before.

FAST LOCK

What is Fast Lock?

Fast Lock is a recessed drop T lock with an integrated electrically controlled lock/unlock system that can be made to function with the existing vehicle remote central locking or with an independent central locking module.

Fast Lock Locking System is unique and Internationally Patented. The technology has been tried, tested, and proven as a device that will give peace of mind.

- IP65 Certified – Rain, Dust and Dirt-Proof.
- Integrated Design – internationally patented.
- Electric motor actuator multi-volt 12-24V to locking mechanism on key barrel.
- Includes 300mm removable wiring tail for easy connection
- Compact and durable.
- Quick installation without dismantling the lock.
- 3 Point locking available, if required.
- Can use key to over-ride manually, if required.
- Concealed stud fix security.
- Assembled and tested in Australia.
- Warranty – 24 Months.
