# BUYING MADE SIMPLE

## **STEP 1 - PICK YOUR PLATFORM**

The basis for a Rambler Vehicles build is the vehicle itself. While we primarily work with Toyota's (only due to their popularity) we have access to all makes and models. We source the vehicle on your behalf and handle all of the logistics of transport and registration.

## **STEP 2 - DESIGN YOUR BUILD**

We work with you to design your build through discussing what you want to use the vehicles for, your must haves and your wants. From here we price up the build and offer feedback based upon our experiences. Our goal is to build the right vehicle for your needs – we are not about “Game Changing Builds”. Our goal is practicality at a price that is reasonable.

## **STEP 3 - MOVE TO PURCHASE**

Once the Make, model and trim level of the vehicle and the build specification has been finalised we move to the order stage. We take care of all aspects of the ordering process from the vehicle itself through to the accessories and vehicle transport. We provide clear timeframes for the arrival of the vehicle, workshop booking times and build process.

**We require an initial 10% deposit to order the vehicle with a further 40% deposit once the vehicle arrives at the dealership. The balance is due 72 hours prior to delivery.**

## **STEP 4 - THE BUILD**

This is the stage where it all comes together! At this point in the process we review the build specification with you and the time frame – this is our final opportunity to make any changes.

Great care is taken by our team to protect your vehicle from damage during the build process – we treat each vehicle like its our own. We communicate with you throughout the build ensuring you are up to date with progress including photos.

Each step of the build is checked off by the tradesman doing the work plus our workshop foreperson. Finally, the vehicle is put through an additional quality assurance process – this is to make sure every detail has been covered – this final process includes test driving your new vehicle (more than just around the block!) and a professional detail. When you pick up your new Rambler it is ready for adventure!

## **STEP 5 - HANDOVER**

At the end of the build process we arrange a full walk through and handover of the vehicle. If you are local to us we do this in person – if the car is being shipped we do this via FaceTime® or Skype®.

This handover covers the vehicle itself (like a dealer handover) as well as explanation and demonstration of the fitted accessories.

# BUILD SPECS

	TOYOTA DUAL CAB (OR SIMILAR DUAL CAB)		TOYOTA LANDCRUISER 79 SERIES GXL DUAL CABS		TOYOTA LANDCRUISER 300 NISSAN PATROL
