

## WHY DO YOU NEED AN ADDITIONAL FUEL FILTER?

Whether you're long-distance touring or driving up your local track in a new-generation diesel 4WD, one thing you need to keep in mind is the quality of the diesel you're using. Modern diesel engines are equipped with high pressure electronically controlled injection systems. More than ever before, fuel quality and cleanliness is critical to the reliability of these highly advanced fuel injection systems.

Designed to efficiently remove particle matter and water from fuel, the FUEL MANAGER Filtration System is simply the best protection you can give your modern Diesel Fuel Injection system to safeguard your vehicle from expensive repairs and the Premium Diesel Care Fuel Filter Kits have been put together to make installation a breeze.

**FUEL MANAGER FILTRATION SYSTEMS REMOVE PARTICLE MATTER AND WATER FROM FUEL**

NB: - Diesel Care Fuel Filter Kits can be plumbed as either a primary or secondary filter system.  
Primary filters are plumbed before the factory filter and will use a relatively coarser filtration at 30 microns.  
Secondary filters are plumbed after the factory filter and will use a finer filtration at 5 or 2 microns.

- The addition of a Fuel Manager filtration system will not restrict flow in Common Rail systems.

\* Additional items not present in kit include suitable assembly and dismantling tools.

## PREMIUM PROTECTION FOR YOUR DIESEL INJECTION SYSTEM

Protect your highly advanced fuel injection system.

Install a FUEL MANAGER filtration system - Designed to efficiently remove particle matter and water from fuel.

Diesel Care Fuel Filter Kits will make the job easy.

# FUEL FILTER ASSEMBLY AND MOUNTING BRACKET KITS

Diesel Care has produced a range of installation kits which makes fitting a FUEL MANAGER Filter to the most popular 4WD's and SUV's an easy task. The kit includes a bracket specific to your vehicle make and model, a FUEL MANAGER Filter, fuel hose, fittings, clamps and fixing hardware.

*Incredibly easy D.I.Y. install that ANYONE CAN DO!*  
The mounting kits and design are that simple.

The FUEL MANAGER is most effectively installed as an additional filter to the original equipment filter. Due to the wide and varied range of cartridge sizes and micron ratings, they may be plumbed as a primary (pre) or a secondary (final) filter.

## APPLICATIONS TO FIT THE MOST POPULAR 4WD'S AND OTHER DIESEL VEHICLES

PRIMARY AND SECONDARY FUEL FILTER KITS FOR TOYOTA, NISSAN, HOLDEN, MAZDA and more...

Everything included to do the job\*

# DIESEL CARE FILTER INSTALLATION KITS WHAT'S INCLUDED?

## CUSTOM BRACKETS MADE IN AUSTRALIA

A wide range of custom, Australian made high quality stainless steel mounting brackets for specific vehicles

## RANGE OF FILTERS

FUEL MANAGER Filter system assembled with the correct cartridge for a particular vehicle and for a specific job (Primary or Secondary)

## COMPLETE KIT

All hose, fittings and hardware required to install the FUEL MANAGER

## DETAILED INSTRUCTIONS

## SIMPLE TIME SAVING INSTALLATION

1 – 1.5 hours in the shed

# FUEL MANAGER THE ULTIMATE DEFENCE AGAINST WATER AND PARTICLE CONTAMINATION WHAT DOES IT OFFER?

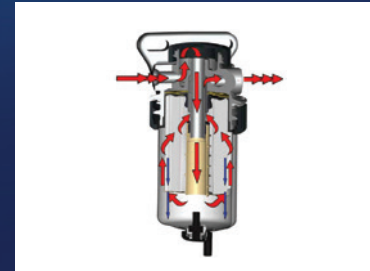

## THREE SERIES

FM10 – up to 200HP  
FM100 – up to 350HP  
FM1000 – up to 600HP

## ENSURES CLEAN FUEL

Specially treated hydrophobic media to remove both water AND particulates

## A WIDE RANGE OF SIZES AND MICRON RATINGS

Filter sizes to meet any application. 2, 5, 10, 30, and 150 micron ratings available

## EASY CARTRIDGE REPLACEMENT

Replace cartridges without fuel spills or the use of tools  
- Quick and easy servicing

**DON'T RISK IT... DIRTY FUEL CAN CAUSE COSTLY DAMAGE**
