## RYCO FUEL WATER SEPARATOR

UNLOCK FLEET EFFICIENCY AND INCREASED DRIVER SAFETY WITH THE COMBINATION OF RYCO FUEL WATER SEPARATOR AND ALERT SYSTEM.

All Ryco products are designed and tested in Melbourne, Australia, meaning Ryco understands the unique challenges posed by Australian diesel quality and rare climate extremes.

### THE PROBLEM:

#### OEM Fuel Filters Have Limitations

Factory-fitted fuel filters can't fully shield your engines from contaminants found in Australian diesel. Harmful particles and water infiltrate your injection system, damaging the vehicle's engine with little to no warning. These damages lead to costly repairs and vehicle downtime.

#### Australian Diesel Quality and Climate Extremes

Australia is not known for its high quality diesel. This coupled with scorching hot summers and cold winters can present unique challenges for vehicle maintenance and fuel stability.

### Water Ingress

Moisture not only finds its way into fuel storage tanks but can also enter vehicle fuel systems through condensation and under-vehicle pressure cleaning. This can cause corrosion, bacteria, and algae to grow which results in the need for timely and expensive repairs.

## PRODUCT INFORMATION

### The Solution: S102XK Ryco Fuel Water Separator Sensor Kit and separate S101X Bluetooth Sensor Indicator

A S102XK Ryco Fuel Water Separator Sensor Kit and additional S101X Bluetooth Sensor Indicator allows for filter monitoring via Bluetooth for early detection of water contamination in your fleet vehicle's fuel. Features include:

- Reduced downtime.
- Proactive maintenance: Address the issues before it becomes a problem.
- Prevents damage to vital engine components and keeps your fleet vehicles running smoothly.
- Reduced maintenance costs, and enhanced engine reliability, ensuring your fleet stays on the road and on schedule.
- Quick and simple installation.
- Improved confidence and driver safety.
- Instant in-car alerts, without leaving the safety of the vehicle's cab.
- Allow the driver to get back to safety/radio reception to ask for help.
- Peace of mind: Drivers can focus on their jobs knowing that their fleet management prioritizes their safety.
- Reduce driver stress and boost morale with our cutting-edge alert system

Put safety first and revolutionise your fleet management today!

For expert advice, top-quality filtration solutions, and an advanced remote alert system, contact us today.
