### High-end Design & IP67 Rated

All INNOVV Powersports Cameras are well known for their simple and rugged yet stylish design, and so is the INNOVV K3. Its cameras and the base of the DVR are constructed of durable and lightweight aerospace aluminium alloy, featuring a stylish appearance and durable performance. Go confidently into every ride with the INNOVV K3 that's built to withstand all kinds of weather with its IP67 rated waterproof high-end design.

### FHD 1080P Dual-camera System

The INNOVV K3 Powersports Cam features dual cameras with a wide 120 degree field of view, capturing important details in crisp 1080P HD video and providing complete coverage around you. The Sony IMX sensor is mounted on both camera lenses, ensuring high-quality recording even at night.

### Automatic Recording

The INNOVV K3 Powersports Cam is designed in a "Fit and Forget" manner, performing an automatic start/stop recording with the ignition on/off. No need to worry about manually charging the battery or remembering to turn the device on.

### External Microphone Input

The INNOVV K3 Powersports Cam embraces an external microphone for better audio input. The microphone cable features better tensile strength and longer flex life, which means the cable can withstand thousands of stretches with its strong and durable design. An open foam cover around the microphone reduces wind noise effectively. It clearly captures your voices, high quality engine sounds or exhaust sounds during the road trip by putting it in the right place, making it a great gadget for moto-vlogging.
