

# HARROP® ELocker

**NO AIRLINES,  
NO COMPRESSOR  
JUST TRACTION.**

FEATURING **E·T·N** TECHNOLOGY

The Harrop Eaton ELocker is the latest generation technology in selectable locking differentials. Utilised by OEM's for durability, with no need for a compressor, airlines, solenoids or other consumable parts, ELocker delivers reliability and total traction on demand whether you are in forward or reverse.

Performing as an open differential until you need instant traction, when selected to lock, the Harrop ELocker captures 100% of available torque and reliably distributes it equally to both ends of the axle.

## HARROP TRACTION APPLICATION GUIDE

The Harrop ELockers electromagnetic locking mechanism is the next generation of aftermarket differential technology. To find out if we have an ELocker for your application, scan the QR code and download our Traction Application Guide or visit our website.

Available throughout Australia from our network of stockists and Traction Dealers
