TODAY!**

DESTINATION 4WD

Completely square, easy to use, Aussie made

Our D270 & D180 awnings

1. Short and massive: The D270 and D180 awnings are 2.2m in length, but give huge coverage: 12.4sqm (D270) and 12sqm (D180).

2. Extendable arms: Our awnings have extendable arms, making them unique, massive and completely square.

3. Extremely strong: Both awnings have a 4mm stainless steel pivot bracket and four aluminium arms. Each arm is 4mm thick at the base to give reinforced and strategic strength. All arms have a solid welded boss at the base to make it even stronger and able to handle strong winds.

4. Australian made: We use Aussie materials and labour, and our awnings and accessories are 100% made and assembled here.

5. High-grade canvas: We use high-grade Australian-made canvas suitable for the harsh Australian weather and sun. It is a 260gsm WaxConverters TearStop canvas that is UV and water resistant.

7. Complimentary brackets: Our awnings come with two 3mm stainless steel brackets that attach to most roof racks.

8. It looks good! The base pivot bracket is a shiny stainless steel, while the channel and arms are powdercoated black for a sleek look, and increased durability.

9. Lightweight: 23kg each.
