

PREDATOR MIT

4WD PERFORMANCE

BLACK BEAR is committed to be the next leading brand in the extreme off-road world.

Black Bear Predator Mud Terrain tyre pattern packs the punch for some serious fun! This latest mud pattern provides excellent grip on muddy or rocky/rugged terrain, allowing you to explore places you seek to venture.

Deep shoulder with max 11mm depth protects tire like armor. The upper half of sidewall with pattern blocks gives excellent tear resistance.

Protruding fractals circumferentially spreading in sidewall provide super self-cleaning and reduce wind noise. Duel sidewall designs provide super self-cleaning and punch resistance.

Excellent grip and tear resistance. Transverse tread block pitch with low angle improves grip. Central big blocks with notches prevent slip and provide great traction.

Optimized bead design improves the tyre's carcass rigidity as well as the handling.
