

# ALL TERRAIN III

4WD PERFORMANCE

**BLACK BEAR** is committed to be the next leading brand in the extreme off-road world.

Black Bear All Terrain III tyres is the newest design All terrain tyre.

The design inspiration for safety and comfort makes all adventures to be enjoyable journeys.

This is exciting new design provides a dual sidewall feature, so you can choose the look from the Black Bear sidewall or a standard sidewall design.

## NEW GENERATION ALL-TERRAIN FORMULA DESIGN WITH LOWER NOISY

REINFORCED CARCASS MATERIAL, THICKENED TREAD PATTERN, AND SIDEWALL PATTERN DESIGN TO PROVIDE STRONG ANTI-TEAR PERFORMANCE FOR THE TREAD.

- ◆ The geared type tread block design provides a more even force between the blocks and reduces noise when the tyre is running.
- ◆ The hook pattern block enhances the grip of the tread pattern.
- ◆ The longitudinal arch pattern block provides more stable driving performance on high speed roads.
- ◆ The combination of even and odd blocks with different shapes in the centre disrupts the frequency of resonance generating noise, reduces air column resonance and provides noise suppression.
- ◆ The design of small grooves in the large tread blocks on the shoulder increases the shape of the tread pattern adjacent tread patterns to lower noise.
- ◆ The reasonable pitch ratio of the entire tread pattern and the optimism arrangement of the tread blocks provide good grip and traction even on snow and ice.

## DUAL SIDEWALL DESIGNS

Each ATIII has two sidewall designs so you can choose how your tires look.

One side has BLACK BEAR sidewall lugs and the other has plain sidewall lugs.
