Hills 2 Beach

All of our products are designed in Australia by our family for your family. Our outdoor suits factor in our diverse environments and weather. Having a variety of features such as highly breathable and quick drying fabric as well as full length zips, means every outing will be stress free.

- UPF 50 +
- Made from recycled plastic bottles
- Product conforms to global recycling standard
- 4-way stretch
- Highly breathable
- Quick dry
- Moisture wicking
- Anti-odour
- Australian designed

HB

Hills 2 Beach

Hi, we are Chris and Mel, a young couple with 2 little kids from Brisbane Australia who love to spend time outdoors. Whenever we ventured out we faced the challenge of keeping our baby and toddler safe from the sun's harmful rays. So we searched the market for a sun-safe product that would provide full-body coverage but found nothing that met our requirements. We wanted a product that would be easy to put on, take off, and change nappies in.

Frustrated by the lack of options, we decided to create a product that would solve this problem. After spending a lot of time designing and manufacturing, we finally came up with a full onesie suit. The full-body coverage of the outfit ensures that the child is protected from the sun's harmful rays and the full-length zipper makes it easy to change nappies and remove the outfit while wet. This is essential when spending time outdoors with young children.

We made sure that our product is made from high-quality materials that are both durable and comfortable for children to wear. We understand that children can be fussy when it comes to clothing, so we made sure that the outfit was designed with both style and functionality in mind. Our product is easy to clean so parents do not have to worry about any stains and the outfit can be easily washed and dried.

4 Make the smart choice.

Look for brands that are made with Repreve when you shop.

1 Remember to recycle.

Toss your plastic bottles in the recycle bin, NOT the trash.

3 Chips to yarn.

Chips are transformed into repreve recycled fiber, and then into fabrics.

2 REPREEVE chips in.

Recycled bottles are cleaned, chopped, melted and turned into little plastic chips.

We are passionate about the environment and wanted to ensure that our product was eco-friendly so we decided to make our product from recycled plastic. This not only reduces the amount of plastic waste in the environment but also ensures that our product is sustainable. By using recycled plastic, we have taken a step towards reducing our carbon footprint and helping to preserve the environment for future generations.

We have poured our hearts into creating our product, and hope that other parents will find it as useful as we have. We have successfully solved a problem that many parents face when it comes to enjoying the outdoors with their little ones. Lets keep our kids sun safe.
