The perfect mix of comfort, towing capacity and sheer V8 grunt, the Y62 Nissan Patrol has earned its reputation as a solid off-roader. However powering such a large, heavy vehicle can compromise on performance and efficiency, and that's where Torqit has developed a product range to safely and effectively address the key problem areas. For the ultimate Y62 performance upgrade, we recommend combining Torqit's products for maximum results.

✔ **Response**    ✔ **Power**    ✔ **Torque**    ✔ **Fuel Efficiency**    ✔ **Note**

## STEP 1 EXHAUST

Torqit's Y62 Performance Exhaust eliminates the restrictions of a stock exhaust to create a balanced yet powerful V8 note without cabin drone. Suited to models from 2013 onwards, the system runs from twin 3" pipes into a single 3" tailpipe, and is designed to:

- ✔ Maximise torque and performance
- ✔ Improve fuel economy and maximise energy output
- ✔ Deepen vehicle note with 304 grade stainless steel up to 2mm thick
- ✔ Prevent drone with two resonators and two mufflers for a balanced note
- ✔ Increase exhaust flow and reduce EGT's and back pressure with fully mandrel bent pipe
- ✔ Withstand extreme off-roading and rugged terrain

Running from the secondary cats back, Torqit's Y62 exhaust also includes a flex bellow for ease of fitment and will accommodate standard aftermarket upgrades such as bash plates, side steps, suspension upgrades, aftermarket fuel tanks, tow bars and a spare tyre. The exhaust bolts together and comes complete with full fitment kit for DIY install.

High flow catalytic converters and performance headers are also available to further increase power and performance. Find out more information below.

## STEP 2 HIGH FLOW CATALYTIC CONVERTORS

If your Patrol has been remapped, heavily modified, or upgraded with a supercharger/turbocharger, Torqit's high flow catalytic converters are a no-brainer for legally increasing your engines power output.

Made up of a honeycomb structure of precious metals inside a stainless steel case, Torqit's cats have a 200 CPSI in comparison to the 400 CPSI of a standard cat. The reduced CPSI means the cats work harder and faster, providing:

- ✔ Increased airflow
- ✔ Extra power and performance
- ✔ Improved fuel economy
- ✔ Lower temperatures and reduced EGT's

As with Torqit's Y62 Exhaust, the cats are manufactured from premium 304 grade stainless steel and include a 10 year product warranty.

## STEP 3 PERFORMANCE EXHAUST HEADERS

Torqit's Performance Exhaust Headers for the Y62 Patrol help increase the flow of exhaust gases from the engine. By providing a more evenly balanced and efficient route for the gases to escape, headers produce:

- ✓ A significant boost in power
- ✓ A louder note
- ✓ Increased engine and fuel efficiency
- ✓ Reduced engine temperatures and backpressure

Torqit's headers are also finished with a Turbo X Ceramic Coating which is rated to 1000 degrees. The coating allows the headers to withstand extreme temperatures for long term protection and performance, plus helps maintain the sleek appearance.

## STEP 4 PEDAL TORQ

The Pedal Torq reduces throttle lag so that your Y62 Patrol is quicker off the mark and has smoother gear changes. This increase in response is particularly noticeable when overtaking and towing, helping improve handling and control of the Patrol's heavy body-on-chassis construction. Potential fuel savings are an added bonus - particularly when cruising long distances at a constant speed. We have two options to remove sluggish behaviour and enhance the drivability of the Patrol: the Pedal Torq or Pedal Torq Plus.

### PEDAL TORQ

- ✓ Five modes with 30 settings
- ✓ Personalise response with Intelligent Mode, which adapts to your driving style
- ✓ Hardwired with easy dash mount control
- ✓ 5 year product warranty

OR

### PEDAL TORQ PLUS

- ✓ Eight modes with over 60 settings
- ✓ Bluetooth connected with wireless control
- ✓ Immobilise vehicle with Anti-Theft Mode
- ✓ 5 year product warranty

Scan or click the QR code to **listen to how each mode changes your vehicle's response.**

For maximum results and savings, we recommend combining Torqit's Y62 Product Range for the ultimate full performance upgrade.

## TESTIMONIALS

*"After doing some extensive research I decided to purchase a Torqit exhaust for my Y62 Patrol. Very happy with my decision. The build quality and after sales service are excellent. Regularly get comments on how good it sounds! Also glad to support a local business which was an added bonus."* - **J.Howarth**

*"Installed the 3 inch stainless exhaust to my y62 patrol, rapt with the quality, sound and power... also a genuine DIY kit. Old exhaust removed and new in within 3 hours. Great product"* - **L.Van Gulick**

*"The most professional and courteous company that I've had the pleasure of dealing with. They transformed a very quiet brand new 2020 Nissan Patrol V8 into a very distinctive rumbling beast when you want to hear the sound of a V8, balanced with a very respectful sound when cruising on the freeway - not too loud just perfect. The workmanship is exceptional with a full explanation provided of how the exhaust system was hand manufactured. Highly recommended."* - **G.Timbs**
