

YOWIE 1600

Introducing 23ZERO's unique raised 'X' frame ABS hardshell roof top tent, the YOWIE!

Ideal for almost any setup, the YOWIE 1600 is perfect for dual cab ute cabins, canopies, tub racks, wagons and trailers. The raised X frame design increases headroom inside the tent while the zippered head vent allows for controlled ventilation for the perfect night sleep. The lift and fold out design together with the automatically deployed entry canopy allows for easy and quick deployment perfect for long stays or the quick overnighter.

Constructed using an aluminium honeycomb 2 piece fold out baseboard, the YOWIE is fitted with a comfortable 65mm memory foam mattress accompanied with a plush velour cover. A strong and lightweight 320gsm ECO performance body tent featuring 23ZERO's innovative LST coating effectively defuses sunlight and UV rays from entering the inner tent.

Large windows on either side accompanied with fully covered canopies provide optimum ventilation whilst keeping you dry in inclement weather. Other features include a star gazing roof window and clear TPU on the flysheet, internal storage pockets, external shoe pockets, LED strip lighting with USB plugs and 23ZERO's standard 2300 telescopic ladder attached.

Pack down is made easy with external fitted bungee cord reducing tent billowing, but more importantly, sleeping bags & pillows can be stowed neatly inside the YOWIE increasing valuable storage space inside the vehicle.
