79-80	General Chat Channels

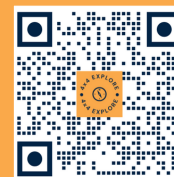

Tyre Pressure Guide.

Terrain	PSI	Remarks
Sealed Road	38	Or higher to suit vehicle mass, towing, etc.
Snow (unsealed road)	32	Maintain sealed road pressures if on road
Unsealed Road	28	Can lower to 25 PSI if corrugations are bad
Mud or Rock	22	
Sand	18	Lower further to suit conditions

- Recommended pressures are for cold tyres.
- If pressures increase by 6 PSI or more while driving on sealed road, cold pressures are too low. Add 2-3 PSI.
- When off-road, lower tyre pressures on trailers to 4 PSI less than the rear tyres on the tow vehicle.
- Pressures of 10 PSI and below risk breaking the tyre bead. Use caution.

About 4x4 Explore.

4x4 Explore plans, books and leads self-drive 4WD tagalong tours of some of the most iconic and remote parts of Australia.
