SUSPENSION PRECISION FOR EVERY JOURNEY

RAW 4X4 NITRO

Recreational 4x4

The RAW 4X4 Nitro gas shock absorber enhances ride quality by minimising body roll and boosting vehicle stability. With its expanded body design for greater oil capacity and nitrogen gas for improved cooling, RAW Nitro shocks are built to last longer than many leading competitors, all at a competitive price.

These shock absorbers are ideal for recreational 4WD enthusiasts seeking to lift their vehicles and elevate overall suspension performance.

RAW 4X4 NITRO MAX

Long Distance Touring

When the terrain and load conditions demand a step up in performance, the RAW 4x4 Nitro Max is the heavyweight champion of our shock absorber lineup. Tailored for heavy coil-sprung and torsion bar vehicles, it utilises a proven truck shock absorber design with specially tuned valving for 4WD applications that tackle heavy loads and rugged terrain.

Ideal for vehicles used in mining, long-distance touring, towing, armoured and other heavy-duty applications.

RAW 4X4 PREDATOR

High Performance

For the 4x4 owner seeking that often elusive balance of comfort and control.

The RAW 4x4 Predator range combines on-road performance with off-road durability in a fast-acting monotube design. The Predator provides that sought-after balance of comfort and control. If you use your 4WD for daily drives and weekend off-road adventures, the Predator is the perfect choice for you.

RAW 4X4 SUSPENSION COMPONENTS

Customised Suspension Solutions

Our high-quality suspension range includes:

- Load-rated Leaf Springs
- Coil Springs
- Upper Control Arms
- Polyurethane Bushes, Greasable Shackles and Pins
- Torsion Bars

RAW 4X4 NITRO MAX AR45

Ready to Lock and Load

Get ready to tackle any terrain with the AR45 solution. Featuring a heavy-duty truck shock design that's been proven over millions of kms.

Equipped with an adjustable spring seat this upgrade transforms your truck from mild-mannered commuter to off-road beast, letting you go from Mild to Wild when the pavement ends.

RAW 4X4 XPR PREDATOR

The Perfect Leveller

XPR: Height Adjustable Coil Over Strut.

The RAW Predator XPR series has been specifically designed to raise the front of coil over vehicles between 2 - 4". Making it perfect for leveling the nose of your vehicle or when further accessories are installed. Based on a monotube design the RAW 4X4 Predator struts are adjustable, providing the ultimate balance of comfort and control, with increased vehicle stability.
