

ALPHACOMFORT BUILT
TOUGH

AUSTRALIA'S
**PREMIUM
SHOCK DIVISION**
TRUE 2.5 INCH BORE

2.5SHOCK
ABSORBERS

When we say 2.5 inch, we mean it — a true 63.5mm bore.

Many so-called 2.5 inch shocks are only that in outer body diameter, not where it counts.

This genuine internal bore size means better heat distribution and improved performance under load. Built specifically for heavy-duty 4x4 use, ALPHA Shocks deliver the strength, cooling, and reliability serious off-roaders demand.

**WHY
CHOOSE
ALPHA?**

- ✓ Serviceable, rebuildable & tunable
- ✓ Cerakote finish for maximum corrosion protection
- ✓ Active control Electric option (G-force)
- ✓ OEM style bushes
- ✓ Up to 32 levels of manual adjustment
- ✓ Vehicle specific valving
- ✓ CNC machine finish
- ✓ Sealed greasable joints
- ✓ Designed for variable loads & changing driving conditions

ALPHA ELECTRIC incab control option available
