THE ALL NEW **ELITE V5** CANOPY HAS BEEN UNLEASHED!

PJ's 4X4 is proud to announce the launch of its most advanced canopy yet – the **ELITE V5 Canopy**. Built for strength, style, and innovation, the **ELITE V5** is the result of years of refinement and customer feedback, setting a new benchmark for tub top canopy design in Australia.

Designed for tradies, adventurers, and touring enthusiasts, the **ELITE V5** combines unmatched durability with cutting-edge technology, ensuring both premium functionality and seamless vehicle integration.

Push button side door entry

Enjoy simple, seamless entry with a cleverly hidden push-button, delivering quick access while maintaining a clean, secure, and modern canopy appearance.

Premium Construction

Fully frame, sleek door design for unbeatable security and insulation. High-quality stainless hardware & mounting system built for long-term durability.

Central Locking

Integrated central locking allows all canopy & vehicle doors to operate simultaneously, providing effortless use, enhanced security, and total peace of mind.

WHAT YOU GET IN AN ELITE V5 CANOPY

Seamless Vehicle Integration & Security

Full vehicle-integrated remote central locking for convenience and ease of use, including integrated door alarm systems (where fitted). Features handle-less push-button side door entry, electronic touch-pad rear door entry, internal release handle, dual-latching doors, and an improved electronically integrated door latching system (eliminating rubber buttons) for superior security.

Smart Ventilation & Visibility

50/50 sliding bulkhead window allows controlled ventilation without compromising security, complemented by a heated rear window demister with in-cabin control.

Premium Construction

Fully frame, sleek door design for unbeatable security and insulation. High-quality stainless hardware & mounting system built for long-term durability.

Modern Design Features

A sleek profile designed to align with your vehicles design and roof line, for maximum style integration.

Advanced Lighting & Electrical Systems

LED strip work lights on each door, plus an interior LED light that automatically activates when any of the three doors are opened. Plug 'n' Play wiring* ensures simple electrical integration.

Roof Load Capacity

Featuring a removable track mount system as standard, with a massive 110kg dynamic and 400kg static rating, providing outstanding strength and load-carrying capability.

Superior Canopy Build & Insulation

Multi-layered fiberglass construction provides exceptional body strength and insulation. A suspended fabric roof lining further improves insulation, enhances appearance, and reduces condensation.

Premium Finish & Manufacturing Quality

Finished using Europe's finest GLASURIT paint, applied via a premium painting system for consistent, high-quality results.

* Plug 'n' Play wiring may not include an alarm function on some models.

NOTE: Your Next Gen Ranger may require a J-brace to be installed if it is built before 12/09/2024

- Please refer to your vehicle manual or dealer.

WHAT WE'VE IMPROVED

We've taken all our customer feedback on board to refine the **ELITE V5 Canopy** for improved visual finish.

Handle-less, push button side door entry

A refined handle-less design with push button access delivers a cleaner exterior finish while improving ease of use and security.

Electronic touch pad rear door entry

The electronic touch pad rear door provides quick, keyless access with a sleek, modern interface designed for everyday convenience.

Sleeker framed door design

The updated framed door design enhances the canopy's overall appearance while maintaining strength, security, and precise vehicle integration.

Larger openings

Enlarged door openings allow easier access to gear and equipment, improving functionality without compromising structural integrity.

Improved roof rail system

The upgraded roof rail system offers increased strength, versatility, and load-carrying capability, supporting a wide range of accessories.

Plug 'n' Play wiring*

Provides effortless electrical installation, allowing seamless integration with your vehicle.

*Plug 'n' Play wiring may not include an alarm function on some models.

NOTE: Your Next Gen Ranger may require a J-brace to be installed if it is built before 12/09/2024 - Please refer to your vehicle manual or dealer.

The **ELITE V5 Canopy** is functional for everyday performance.

Sleeker interior finish

A refined interior finish delivers a cleaner, more modern look while enhancing durability and ease of maintenance.

Improved mounting system

The enhanced mounting system provides a stronger, more secure fit to the vehicle, improving stability and long-term performance.

Upgraded paint supplier to Europe's finest, GLASURIT

Finished with premium GLASURIT paint from Europe's finest supplier, ensuring superior colour consistency, durability, and long-lasting protection.

Premium painting system

Advanced premium painting system ensures precision application and a consistently high-quality finish across every canopy.

Improved door latching system with electronic integration (no more rubber buttons)

An electronically integrated latching system replaces traditional rubber buttons, delivering smoother operation, improved reliability, and enhanced security.

Increased quality stainless hardware and bracketry

Higher-grade stainless steel hardware and bracketry provide increased strength, corrosion resistance, and long-term durability.

TOP 5 REASONS WHY YOU SHOULD CHOOSE AN **ELITE V5 CANOPY**

SECURITY

No other fiberglass canopy on the market can offer the level of security that the **ELITE V5 Canopy** offers. The reason is the fully framed doors all the way around the canopy which are double latched and connected to your ute's OEM central locking AND the integrated door alarm*.

AESTHETICS

Arguably one of the best-looking canopies available today, the **ELITE V5** has been styled with a strong focus on clean lines, modern proportions, and overall visual balance. Its sculpted fiberglass design delivers a sleek, contemporary appearance that complements today's utes without the bulky, outdated look of traditional canopies.

Gone are the days of the "old man's bubble" on the back of your ute — the **ELITE V5** represents a new generation of canopy design, bringing style, refinement, and a premium finish into the future.

FUNCTIONALITY

Using your canopy in any situation is as easy as the PRESS of a button with vehicle integrated central locking, handle-less push button side door entry, electronic touch pad, rear door entry and FOB key door opening on selected models. Marry these great features with LED work lights on all 3 doors along with large, convenient door openings, the **ELITE V5 canopy** is unbeatable in functionality.

INSULATION

Completely hand made in fiberglass which not only exhibits excellent thermal and acoustic insulation, it also improves energy efficiency, and reduces noise.

The framed doors (also framed in fiberglass) stand out as solid doors as opposed to the traditional style of canopy windows which is just a sheet of glass, allowing increased heat transfer.

The interior of the canopy also has a layer of insulating foam and a suspended roof lining; creating an air pocket to significantly improve insulation properties of the canopy.

The benefit is that any thermo-sensitive equipment like camping fridges, wont have to run as hard to stay to temp. The insulated canopy also creates an ideal environment for furry family members and is known to be the best canopy for pets.

PEACE OF MIND

The above reasons are enough on their own to give any prospective canopy owner great peace of mind when choosing a new canopy for their ute.

The **ELITE V5** wiring is developed to be predominately Plug 'n' Play thanks to our partnership with the world class wiring company 'Motherson Lumen'.

Our industry leading, premium painting system ensures precision painting combined with a world leading paint company GLASURIT who is the supplier for premium vehicle manufacturers like Mercedes, Porche and Audi.

INDUSTRY LEADING WARRANTY

STRUCTURAL	4 Years
PAINT	3 Years
